PREFACE

THE third volume of the Panjab Museum Coin Catalogue describes the money of Nādir Shāh and of the Durrānī dynasty struck at mints in Afghanistan and India. The general plan is that of the preceding volumes.¹ The coins now described include those from the two separate Cabinets at Lahore, the Government Collection proper and that of Mr. C. J. Rodgers which was purchased by the Panjab Government.² The series is by no means common and few pieces were added in subsequent years till the great Bahāwalpūr treasure became available. Through this unique opportunity our Durrānī Cabinets have been much extended and improved. The Panjab Government has generously authorized and financed the production of the present work. Coins from all available sources have been incorporated in the Catalogue which is in fact a Corpus.

This work is the outcome of a happy opportunity. In December, 1908, by the direction of the Panjab Government, Mr. E. D. (now Sir Edward) Maclagan being Chief Secretary, and with the consent of the Council of Regency on behalf of the infant Nawab, I was allowed to inspect the old coins in the Bahāwalpūr State Toshakhāna at Bahāwalpūr in the south-west Panjab.³ The treasure, probably only a part of what formerly existed, had been conveyed to the present capital some time previously from the desert stronghold of Derāwar on the bank of the extinct river Hakra. There were fifty thousand gold and more than four hundred thousand silver pieces; most of the coins were issues of the Durrānī

³ Toshakhāna literally means storeroom, wardrobe.

dynasty of Afghanistan and India. In the two weeks at my disposal I could only touch the fringe of so vast a mass of material but I did everything possible; the results were communicated in a Report to the Panjab Government, the substance of which was published in the *Journal of the Asiatic Society of Bengal*, August, 1909. The Bahāwalpūr State generously accepted proposals that moderate prices should be fixed for the selected specimens which in this way could be acquired by museums and private collectors. During the course of the next twelve years I was able to pay five more visits to Bahāwalpūr and I am much indebted to the State authorities for their kindness and hospitality.

A rupee of Nādir Shāh was published during his lifetime (J. D. Koehler, *Historische Münz-Belustigung*, Nürnberg, 1746, vol. 18, p. 105). O. G. Tychsen mentions one or two specimens in his work *In Rem Numariam Muhammedanorum. Additamentum I*, Rostock, 1796. There are a few Durrānī coins in the second volume of Marsden's *Numismata Orientalia*, London, 1825. These issues did not escape the researches of C. M. Fraehn; a number are described in *Pars Prima Opusculorum Postumorum*, Petropoli, 1855. Mr. C. J. Rodgers took a considerable interest in the money of the eighteenth-century invaders of India. His paper 'On Some Coins of Nādir Shāh struck in India' (*Num. Chron.*, 1882) was followed by a substantial contribution on 'The Coins of Aḥmad Shāh Durrānī' (*J.A.S.B.*, 1885). The latter was supplemented three years later by Mr. M. Longworth Dames's excellent monograph entitled 'The Coins of the Durrānīs' (*Num. Chron.*, 1888). The work of Mr. W. H. Valentine, abundantly illustrated, is valuable for the copper coins.¹ The Lahore Catalogues already mentioned, together with Mr. C. J. Rodgers's Indian Museum Catalogue, about complete the scattered literature on the

¹ *Modern Copper Coins of the Muhammadan States*. Spink. London, 1911. *The Copper Coins of India*. Part II. *The Panjab*. Spink. London. I have seen the coins of Mr. R. Sutcliffe and cannot always accept Mr. Valentine's hand-drawn versions of the legends and dates.

subject.¹ In 1885 Mr. Rodgers had observed that 'the coins of Aḥmad Shāh Durrānī are becoming rarer every day, indeed it is seldom they are now met with'. Twenty-three years later the enlightened action of the State gave access to the great Bahāwalpūr hoard of nearly half a million coins. Fortunately I found that the issues had been roughly classified; many of the bags contained old money of the Bahāwalpūr State, gold and silver double and single pieces of the Durrānī kings Maḥmūd and Shāh Shujā' minted at Bahāwalpūr and debased Hirāt silver of Maḥmūd. Next in number came mixed coins of the Durrānī dynasty, many thousands altogether. Imperial Mughal coins were only a residue of the whole, but even so were of great numismatic importance because there were quite six thousand Mughal gold mohurs in mint condition. The Mughal rupees, as a rule much worn, were scattered at random throughout the bags of mixed silver and often only a score would turn up out of a bag of a thousand, but the results justified the labour expended. At first I confined my attention to a search for new or rare Mughal coins; my later visits were devoted to completing the Durrānī lists. The oldest coins in the hoard were a few gold pieces of the Great Mughals, Akbar and Shāh Jahān. There were hundreds of Aurangzeb's gold coins, mostly of Akbarābād (Agra) mint. The Mughal silver may be said to start from Aurangzeb and to end with 'Ālamgīr II (1759 A.D.); it yielded several novelties from the Sind mint towns. The great mass of material consisted of Durrānī money and must have contained almost every type, year, and mint (except Kashmīr) of Aḥmad, Taimūr, and Zamān. Coins of the later Durrānīs, except of Bahāwalpūr and Hirāt mints, were scarce; fractional pieces and money of Kashmīr mint were entirely lacking. Coins of the rebel princes Sulaimān and Humāyūn came to light for the first time; I do not know of them from any other

¹ *I.M. Coin Cat.*, Part IV, Calcutta, 1896. As regards private Cabinets there is amongst others the *Catalogue of the Eugene Leggett Collection*; the Collection of the late Dr. White King sold at Amsterdam in 1904-05 by J. Schulman is outstanding.

source.¹ The hoard was rich in money of Kābul and Qandahār (Aḥmad Shāhī) and naturally of such mints as Multān, Bhakhar, Dera, and Derajāt. All known specimens of the rare Camp (Rikāb) mint, except the gold coin of Taimūr, came from Bahāwalpūr as did the rupees of Prince Qaiṣar struck at Kābul and Aḥmad Shāhī mints.² I added two or three new mints and types to the scarce series of Nādir Shāh struck in India.

The character of the State treasure reflects the circumstances of the ruling family, the Dāūdpotra chiefs of Bahāwalpūr, old allies of the British. The territory, lying along the edge of the Great Indian Desert, between the Panjab and Sind, came into notice with the disintegration of the Mughal empire. The first Nawab of Bahāwalpūr was Amīr Ṣādiq Muḥammad Khān I who captured Derāwar fort in A.H. 1146, A.D. 1733. When Nādir invaded the Derajāt six years later, the Dāūdpotra went to meet him at Dera Ghāzī Khān and was granted the title of Nawab; this was when Nādir partitioned Sind among certain chiefs in the month of Zilḥijj, 1152. During the reign of the fourth Nawab, Muḥammad Bahāwal Khān II, A.H. 1186–1224, A.D. 1772–1809, the State was virtually a part of the Durrānī empire. Mountstuart Elphinstone visited Bahāwalpūr in November, 1808, at the head of a Political Mission, and was cordially received by 'Bahawul Khaun, the chief of one of the king of Caubul's eastern provinces' (Elphinstone's *Account of the Kingdom of Caubul*, London, 1839, vol. I, p. 20). In February, 1833, a treaty was negotiated with the British Government by the sixth Nawab, Bahāwal Khān III; this was supplemented by further agreements in succeeding years culminating in an alliance for the restoration of Shāh Shujā'. The royal exile,

¹ Except the Kashmīr rupee of Sulaimān which I found in Srinagar. The coins of Sulaimān and Humāyūn in the Michael Cabinet—Ithiel J. Michael Sale Catalogue, J. Schulman, Amsterdam, March, 1914—came from the specimens selected by me at Bahāwalpūr.

² The beautiful Rikāb mohur of Taimūr Shāh was purchased for the British Museum at the Da Cunha Sale, Messrs. Sotheby, 1889.

accompanied by the Bengal contingent, passed through Bahāwalpūr at the end of December, 1838. Sufficient has been said to explain the connexion of Bahāwalpūr with Nādir Shāh and the Durrānī kings. I have little doubt that the Mughal gold came from Nādir's loot of Delhi. The State still possesses superb stones which were once crown jewels of the Great Mughals.

Afghanistan and the Afghans played a great part in India and Iran during the eighteenth century. There were repercussions on the one side with the Mughal, Mahratta, and Sikh powers and on the other with the Persian empire. Nādir Shāh, the Persian, and Aḥmad Shāh, the Afghan, are best known in connexion with the tremendous misfortunes they brought upon the decaying Mughal empire of India. The fate of Delhi at the hands of the rapacious Nādir Shāh is one of the object lessons of history. His invasion reduced Northern India to anarchy and he took away jewels and specie to the estimated value of eighty-seven million pounds sterling; this immense treasure included the historic peacock throne and the Koh i Nūr, preëminently the great diamond of legend and romance.¹ Nādir annexed Sind and all Mughal territory west of the Indus. This catastrophe occurred only thirty-two years after the death of Aurangzeb.

An outstanding triumph of Indian art was the peacock throne; the body was of enamelled gold, the eyes diamonds, and the outstretched tail shimmered with sapphires and emeralds. The jewels of the Mughal Court were unrivalled. With that prodigy of diamonds, the Great Mughal, were the Daryā i Nūr, Sea of Light, the Koh i Tūr, Mountain of Sinai, the Taj i Māh, Crown of the Moon, and the Koh i Nūr, Mountain of Light. The great gems were still more widely scattered upon the assassination of Nādir Shāh, and it is possible that some of the finest crown jewels of Europe come

¹ *The History of Nādir Shāh*. James Fraser. London, 1742. *The History of Nādir Shāh*, being Vol. IV of Jonas Hanway's *Historical Account of the British Trade over the Caspian Sea*. London, 1753.

from the hoards of Delhi. In the battle of Pānīpat, A.D. 1526, the Rajah of Gwalior was slain and his most precious jewel, the Koh i Nūr, valued 'at half the daily expense of the whole world', came to Humāyūn, son of Bābur. Two centuries later the wonderful store of gems belonging to Humāyūn's descendants was carried off to Afghanistan. The treasures of Nādir were looted by the Durrānīs. The Koh i Nūr was taken from Shāh Zamān when he was dethroned and blinded by his half brother Maḥmūd but was later recovered by Zamān's full brother Shuja', together with a famous ruby called Fakhrāj. Shuja' in his turn was driven out of Kābul; he fell into the hands of the Sikhs and was constrained to deliver up the Koh i Nūr diamond to Ranjit Singh. After the Sikh Wars the priceless stone came to the British Crown.¹

The invasion of Nādir Shāh was terrible enough in itself; it also showed the way to others. The tyrant was assassinated in June, 1747 (A.H. 1160) and was succeeded in Persia by his nephew 'Adil Shāh. The rest of the empire fell to Aḥmad Khān the Afghan, of the Sadozai section of the Abdālī tribe, the first ruler of an independent Afghanistan. The Sadozai assumed the titles Aḥmad Shāh, Durr i Durrān (Pearl of Pearls), and made Qandahār his capital; the Abdālīs were henceforth known as the Durrānīs.² Aḥmad, like his master Nādir, was a great leader of men and his thoughts at once turned towards India. He invaded the Panjab several times during his reign, penetrating as far as Delhi on two occasions;

¹ Tavernier visited Delhi in the reign of Aurangzeb and described the peacock throne (*Tavernier's Travels in India*. Edited by W. Crooke, Oxford, 1925, vol. I, p. 303). See also Jadunath Sarkar, *Studies in Mughal India*, London, 1920, p. 18. For the Koh i Nūr see E. W. Streeter, *The Great Diamonds of the World*, London, 1882. *The Koh i Nūr Diamond*, London, 1895. W. Crooke has an appendix on this famous gem, *op. cit.*, vol. II, p. 343. He refuses to believe that the Koh i Nūr was Bābur's diamond.

² See p. xxiii; also Elphinstone's *Cambul*, London, 1839, vol. II, p. 95; and W. Irvine, *Indian Antiquary*, 1907, p. 63. The Durrānīs were the populous tribe settled in and around Qandahār whose best-known clans were the Popalzai and the Bārakzai. The Sadozai section of the Popalzais gave Afghanistan its first dynasty and the second royal line was to come from the Muḥammadzai sub-division of the Bārakzais. According to Edward Thomas the term Durrānī may go back to the ninth century (*J.R.A.S.*, 1883, p. 85).

the Mughal capital was devastated.¹ Lahore, the north-west Panjab, and Kashmīr were added to the Durrānī empire, the rising Sikh power was repeatedly chastised and a large Mahratta army was destroyed at Pānīpat, one of the decisive battles of India. Aḥmad Shāh Durrānī, the virtual emperor of Hindustan, could have established a new dynasty at Delhi. His power extended from Lahore to Meshed and from the Oxus down to Qandahār. Yet Aḥmad Shāh, 'the very ideal of the Afghan genius, fitted for conquest yet incapable of empire', never attempted to improve a victory or to organize the government of a conquered country.

Aḥmad's successor was the indolent Taimūr Shāh who moved the capital from Qandahār to Kābul. His father's prestige barely kept the ramshackle empire together. East of the Indus the Durrānīs still held Kashmīr, Sind and Multān, though Lahore was already lost to the Sikhs. West of the Indus were Pashāwar and the Derajāt, together with the country of Hirāt, Kābul, Ghazni, and Qandahār, or modern Afghanistan south of the Hindu Kush. Money struck at Meshed and Balkh testifies to precarious authority in Khurāsān and Turkistān.

The Durrānī empire was founded by violence and built upon the blood and treasure of Hindustan; its history has been called an almost unparalleled series of treasons, rebellions, plots, and murders. Only the distractions of war against a common enemy and the personality of the ruler kept the structure together. By the time of Shāh Zamān foreign war had ceased to be easy and profitable. Delhi was gutted and nothing but hard knocks could be got from the Sikhs of the Panjab; on the other side were the Qājārs of Persia. The Afghans turned upon one another and the struggle began between the twenty-three sons of Taimūr Shāh, the Sadozai, and the twenty-two sons of Pāyanda (Sarafrāz) Khān, the

¹ Thirty years later the palace fort itself was sacked by the infamous Rohilla chief Ghulām Qādir Khān who left the emperor Shāh 'Ālam not even his eyes to weep with.

Bārakzai, which ended in the transfer of power from the Durrānī Shāhs to the Bārakzai Amīrs.¹ The first decade of the nineteenth century witnessed the capture of Delhi by Lord Lake (September, 1803) and the consolidation of the Sikh commonwealth under Ranjit Singh, the Lion of the Panjab. By the treaty of 1809 the River Sutlej was declared the boundary of the Sikh power towards Hindustan, and Ludhiāna became the British frontier station. Ranjit Singh captured Multān and Pashāwar, occupied Kashmīr and annexed the Derajāt. All the foreign possessions of the Durrānīs were lost and the future of Afghanistan lay within her own boundaries. The Bārakzai brethren were masters of the country but at first made use of Sadozai princes as puppet kings. Dost Muḥammad waited a number of years before striking coin in his own name.² Anonymous silver pieces and autonomous copper coins are known of this intervening period; they were struck by the Bārakzais.

The coins of Nādir Shāh struck in India are interesting relics of the invasion. There is no issue of a special character to commemorate his seizure of the Mughal capital. On the other hand, a few rare pieces bear witness to the fear inspired by the ferocious tyrant in the remote capitals of Gujarāt and Bengal. The mintmaster of Murshidābād invented a new couplet for the occasion; his colleague at Patna was equally obsequious but less ingenious. The initial coinage in gold and silver of independent Afghanistan is of full weight

¹ The history of the Sadozais and Bārakzais illustrates the drawbacks of polygamy. Twenty-three sons of Taimūr Shāh are enumerated on p. 106 of J. P. Ferrier's *History of the Afghans*, London, 1858. The names of the twenty-two Bārakzai brethren are given on p. 36 of vol. III of Charles Masson's *Narrative of Various Journeys in Balochistan, Afghanistan, &c.*, London, 1844. Both Sadozais and Bārakzais are Durrānīs. Mr. G. P. Tate has noted that the title Shāh, like Sultān, signifies a despotic ruler. It was established by the great Aḥmad Shāh at the risk of offending his turbulent nobility and implies a power over the person and property of the subject repugnant to the character of the Afghan race. The Bārakzais had filled the office of Amīr ul Umarā under the Sadozais and were content with the lesser title Amīr, which denotes the possessor of delegated authority. G. P. Tate, *The Kingdom of Afghanistan*, Bombay, 1911, p. 152.

² The earliest piece noted by L. White King is dated A.H. 1250, A.D. 1834-5, 'Coinage of the Bārakzai Dynasty', *Num. Chron.*, 1896, p. 333.

and good quality; consisting of Indian metal, it appropriately follows the Indian and not the Persian model. It is Mughal money with a difference; a true Durrānī style is soon evolved. The Durrānī money is the equal of the contemporary Mughal coinage in conception, execution, and metal quality. Shāh Zamān was a great moneyer. His short reign of eight years saw the issue of an artistic coinage in good metal, broad, well struck, of full weight, in considerable variety; the Qandahār (Aḥmad Shāhī) issues are about the finest of the dynasty. It is surprising to find such lavish strikings and so much care devoted to the coinage in a poor and barbarous country; the prevailing insecurity is only betrayed by the frequent aberrations of regnal date. The explanation must lie in the almost superstitious regard paid in the Muḥammadan world to the *khutba* and the *sikka*; the bullion was the loot of unhappy Hindustan.¹

The copper pieces struck in India and old Mughal territory outside Afghanistan are as a rule on the Indian model; they display the royal name, Hijri and regnal dates, and the mint. Copper coins struck in Afghanistan are autonomous pieces of Persian design and weight. It was the custom in Persia for towns to issue their own copper money. On one side is a heraldic or geometrical device, a sword, the figure of an animal, bird or flower; on the other appear just the word فلوس 'copper money', the mint, and Hijri date. There is neither the word *sikka* nor a regnal date. The pieces are local money in the nature of tokens; Dr. R. Stuart Poole correctly classified them by towns and not by reigns.² It was my intention to exclude autonomous money from this work but on second thoughts I have added to the Catalogue specimens selected from those described by Mr. Rodgers and Mr. Valentine.

The Catalogue is based upon the Collection in the Panjab Museum, Lahore. I have added issues, unrepresented at

¹ خطبة Friday sermon with a kind of bidding prayer. سکه The mint stamp, the royal prerogative of coining.

² *British Museum Catalogue of the Coins of the Shāhs of Persia*, London, 1887, pp. 212 f.

Lahore, from other Museums and from various papers and catalogues; the sources of these coins are given. The coins of Nādir Shāh and of the Durrānīs in the British Museum are very fine; they include those of my own Cabinet which was acquired in April, 1922. These issues are now well represented in the Indian Museum, Calcutta. The number of coins catalogued from all sources is 1,327—167 gold, 1,007 silver, and 153 copper—from 27 mints; the Panjab Museum contingent numbers 673—55 gold, 559 silver, and 59 copper. The Lahore Cabinet is thoroughly representative and contains some fine series in silver.

The Catalogue is concerned largely with place names in India and Afghanistan; I have adhered to a modified Hunterian system of transliteration. A separate Table of this is not given because the Catalogue exhibits the Persian and English forms of the mint names together. I write Hirāt and Pashāwar; the names appear in this way on the coins. There is no Glossary because words and phrases are explained in the Introduction.

The Introduction contains enough historical matter to elucidate the mintages; the money in mint and date faithfully reflects the vicissitudes of empire. The historical part is followed by Sections on inscriptions and weights; then come the Mint Notes and the Catalogue proper. The Durrānīs, following both Mughal and Persian practice, inscribed Persian couplets on their gold and silver coins. I have incorporated in the Catalogue a metrical version of each Persian couplet as it occurs, and have added English translations.

The coins of each king are classified according to their mints, the mints come in the Persian alphabetical order and the issues of each mint are arranged chronologically. In the mint and date columns a line means that the coin is defective in consequence of the fact that the die was too large for the flan, or is illegible in these particulars. If a coin is mintless or dateless, or both, the appropriate spaces are left blank.

The weight is given in grains and the size in inches ; if these particulars are omitted, the coin is the usual gold mohur or silver rupee. The marks on Durrānī coins much resemble those on the Mughal series.

A short list of works is given by Mr. Longworth Dames on p. 327 of *The Coins of the Durrānīs*. I would add H. W. Bellew's *Afghanistan and the Afghans*, London, 1879, and G. P. Tate's *The Kingdom of Afghanistan, The Times of India* Office, Bombay, 1911 ; I commend the latter as an introduction concise yet full of detail. The inset of the Map is taken from Mr. Tate's book and the Genealogical Table is a modified copy of that prepared by Mr. Dames. I repeat the motto which is on the Title Page of my *Catalogue of the Coins of the Mughal Emperors*. It aptly describes the coins of those men of the sword Nādir Shāh and Aḥmad Shāh Durrānī.

The greater part of this work has been done in the Coin Room of the British Museum and I am most grateful to Mr. J. Allan, Keeper of the Coins, for all the help he has given me. I record my acknowledgments to the Directors of other Museums who have kindly permitted me to mention their coins. The casts for the Plates were made by the late Mr. A. P. Ready, electrotypist to the British Museum, while the Plates themselves have been produced by the firm of Messrs. McLagan & Cumming, Warriston Road, Edinburgh, to whom I am also indebted for the Frontispiece. The original of the Frontispiece is in the Museum Print Room and is reproduced by kind permission of the Trustees of the British Museum. The Map is from the Geographical Establishment of Messrs. Edward Stanford, Longacre, London. Finally, I wish to thank the Staff of the Clarendon Press for the great care and ability devoted to the production of this work.

INTRODUCTION

MATTER introductory to the Catalogue proper is incorporated in the Mint Notes. A brief historical sketch describes the growth of the empire of Nādir and Aḥmad Shāh, its equilibrium under Aḥmad's son Taimūr Shāh and the subsequent decline and fall. The accessions and deaths of kings, the attempts of pretenders, civil wars, foreign expeditions, the capture and loss of towns and territories are mirrored in current coin.

§ 1. HISTORICAL OUTLINE

The Mughal empire of India and the Ṣafavī empire of Persia alike showed signs of disintegration towards the end of the seventeenth century. The tribes of western Afghanistan had come under Ṣafavī rule but they turned the tables by invading Persia and sacking Iṣfahān under the Ghilzai leader Maḥmūd Shāh; Iran was ravaged and laid waste during the brief period of Afghan supremacy, A.D. 1722-9. To the east confusion was growing in the administration of the outlying provinces of the Mughal empire. At this juncture Nādir Shāh appeared on the scene as an instrument of vengeance, a world conqueror. He turned the Afghans out of Persia, drove back the Turks and Russians from the Caspian marches and seized the Persian crown. The timidity and weakness of the Mughal promised easy triumphs in India.

Nādir Qulī, the Slave of the Wonderful One (God), belonged to the Turkmān tribe of Afshārs and was born in Khurāsān about the year 1687. His father made caps and sheepskin coats for a living, while the son was a shepherd boy. Nādir later took to the mountains and became the leader of a brigand band. His strength and daring recommended him to the governor of Khurāsān at a time when the disorders of Persia gave great scope to the ambitions of so able and unscrupulous an adventurer. In 1722 Shāh Ḥusain Ṣafavī was driven from his capital Iṣfahān by the Afghans under Maḥmūd the Ghilzai, whose cruelties filled Persia with blood. The heir-apparent of the Ṣafavīs, Ṭahmāsp Shāh, fled to Māzandarān in the north and his desperate condition compelled him to accept the overtures of Nādir Qulī, who had grown strong enough to capture and hold the mountain stronghold of Kilāt, some fifty miles from Mashhad (Meshed). Nādir's aims were no longer confined to the plunder of

defenceless peasants; he was destined to deliver Persia from her foreign enemies and to subvert the reigning dynasty. In 1727 Nādir enlisted under the fugitive Ṭahmāsp who honoured him with the name of Ṭahmāsp Qulī Khān. The new general initiated a series of campaigns which culminated in the triumphant recovery of Iṣfahān from the Afghan usurper Aṣhraf, son of Maḥmūd, in November, 1729. Subsequent fighting against the Turks carried the victorious Persian arms as far as Tifis on the west; the Grand Seigneur was compelled to restore Georgia and Armenia to Iran and a treaty of peace was concluded in the year 1735. Meanwhile Shāh Ṭahmāsp had been deposed and replaced by an infant son named 'Abbās who died early in 1736. Ṭahmāsp Qulī Khān seized the vacant throne and was proclaimed on the 11th March 1736 with the name and titles of *Sultānu-s-salāṭīn i Jahān, Shāh i Shāhān, Nādir Shāh, Pādshāh, Šāhibqirān*.¹

On the 13th October 1736, Nādir Shāh marched out of Iṣfahān bound for Qandahār. This important position fell in the spring of 1738 after a siege of fifteen months. For services rendered the Abdālī tribe of Afghans was restored from exile at Hirāt to its lands in this vicinity, and a new city was built and named Nādirābād. It is recorded that Nādirābād was in occupation by the end of 1738 and proclaimed capital of the province; this is confirmed by the coin date A.H. 1151 which year began in April, 1738. Meanwhile Nādir was advancing to the Indian frontier bent upon the plunder of Hindustan. He had taken into his service an Afghan, Sardār Aḥmad Khān Abdālī, who was destined to be his successor. Ghazni and Kābul fell in turn, the Khyber was forced and Pashāwar taken. With the fall of Pashāwar in October, 1738 passed away the Mughal dominion west of the Indus. The invasion of India occupied the cold weather of A.D. 1738-9, A.H. 1151-2. The Persian marched by the imperial highroad through Lahore and Sarhind and was met by the Mughal emperor Muḥammad Shāh and his army near Karnāl. The battle was fought in February, 1739 and resulted in an easy victory for the invader. At Delhi there followed a great massacre of the defenceless citizens in which 120,000 people are said to have perished, after which the capital was subjected to a systematic and merciless spoliation for the space of fifty days. This terrible visitation put an end to all authority in Northern India. It has been said of Muḥammad Shāh that if his fate had

¹ Sultan of Sultans of the World, King of Kings, Nādir Shāh, Emperor, Lord of the Planetary Conjunctions. The word for emperor is *pādshāh* in Persia, *bādshāh* in India. These titles are written under the portrait which forms the frontispiece of this work. Šāhibqirān was the special epithet of the great Tamerlane, and was used by some of the Mughal emperors of India. Nādir نادر means rare, marvellous; the English nadir has another meaning and is derived from a quite different word [نظير].

placed him in a region where established laws supply the want of parts in a monarch, he might have slumbered with reputation upon a throne and left behind him the character of a good, though not of a great prince.¹ Opposed to this ease-loving ruler was a captain unsurpassed in personal prowess and powers of command. These qualities were marred by ferocity and an insatiable avarice; in his last years Nādir became a monster of blood and cruelty. He was assassinated in camp by his own officers in June, 1747 (A.H. 1160).

After the death of Nādir Shāh, the Afghan contingent of his forces retreated to Qandahār where one of his ablest officers, the Aḥmad Khān aforesaid, of the Sadozai clan of the Abdālīs, was elected king of Afghanistan in July, 1747; he seized a large treasure which was on its way to Nādir.² Aḥmad Khān assumed the style and titles of Aḥmad Shāh, Bādshāh, Durr i Durrān (Pearl of Pearls), and the Abdālīs were henceforth known as the Durrānīs.³ The Sadozai was already king in July, 1747, and half the year 1160 had yet to run, but I do not know of any coin dated A.H. 1160. Nādir Shāh's successor in Persia was his nephew 'Ādil Shāh. Aḥmad Shāh at once prepared for a descent on India and invaded the Panjab in the autumn of 1747; the Afghans entered Lahore on the 22nd January 1748, first month of A.H. 1161. A general engagement with the imperial troops headed by Aḥmad, son of Muḥammad Shāh, took place near Sarhind and the Afghan forces retreated, demoralized it is said by some war rockets which exploded in the wrong direction. The Mughal army was returning to Delhi when it received the tidings of the death of Muḥammad Shāh; the Durrānī's namesake succeeded as Aḥmad Shāh Bahādur at the end of April, 1748, or the first of the fifth month, A.H. 1161.⁴ This news attracted Afghans east of the Indus a second time but they soon retired. Coins were struck by the Durrānī at Lahore and Sarhind in A.H. 1161. In the autumn of the same year 1748, Aḥmad Shāh captured Hirāt and Meshed from the Persians.

¹ A. Dow, *History of Hindostan*, London, 1768, vol. II, p. 45. Jonas Hanway recorded a considered judgment of Nādir Shāh. *Op. cit.*, pp. 265 f.

² H. G. Raverty distinguishes between this kingdom dating from the middle of the eighteenth century and the original Afghanistan, the mountain home of the Pathan race, surrounded on all sides by the walls of the Sulaimān Range. The Afghan State of Hirāt, Kābul, Ghazni and Qandahār is a modern conception (*J.A.S.B.*, 1885, p. 143). See also the elaborate description on pp. 453 f. and especially pp. 466 and 467 of *Notes on Afghanistan*, London, 1888. There is a parallel passage on p. 8 of G. B. Malletson's *Herat*, London, 1880; the Afghans proper were the robbers of the mountain.

³ The correct title دُرّ دَرّان is clearly shown on coin Pl. II, 16; these words cannot mean Pearl of the Age. A pearl in the ear was a badge of servitude (*Num. Chron.*, 1929, p. 23). Aḥmad had earned supreme power as chief servant, a pearl of pearls, to Nādir Shāh.

⁴ The first money of each emperor is dated 1161, 1, a possible source of confusion.

The gallant Mir Mannū, son of Muhammad Shāh's Vazir, was made governor of Lahore; he was defeated under the walls of the city by Aḥmad Shāh in April, 1752 (A.H. 1165) on the occasion of a third invasion. The imperial filibuster did not advance further; the provinces of Lahore and Multān were annexed to Qandahār. During the next few years things went from bad to worse in Hindustan. Aḥmad Shāh Bahādur had been deposed, blinded and murdered, and the Mughal throne was occupied by a puppet king under the grandiloquent style of the second 'Ālamgīr. Another inroad was planned and 'the prospect of a winter campaign in India filled with joy the hearts of the needy Afghan tribesmen. Enough still remained to fill their saddle bags, and their religious fanaticism was glutted with the pillage and massacre of Hindus.' Aḥmad Shāh captured Delhi and rode south to Agra. The historian says that not a single straw was left in the capital; the Jumna ran red with blood from the slaughter at Muttra. The Afghan monarch and his son Taimūr married daughters of the imperial house, and Prince Taimūr was appointed Nizām or governor of Lahore, Multān, Dera and Sind. These events took place in the winter of A.D. 1756-7, A.H. 1170, and money was struck at the Mughal capital in the name of the invader. Aḥmad Shāh began the return journey to his capital Qandahār at the end of March. Three months later Robert Clive fought the battle of Plassey.

The affairs of India had been reduced to chaos and the prevailing misery was increased by the advent of the Mahrattas, who swept through Delhi into the Panjab and drove Taimūr out of Lahore over the Frontier. The disorders at Delhi culminated in the murder of the wretched 'Ālamgīr II at the end of November, 1759. In response to the appeal of his fellow Muslims, Aḥmad Shāh crossed the Indus at the end of that year. The Mahrattas were expelled from Delhi two months later and the Mughal capital was given over for three days to a general plunder. The devastation had been so thorough that Aḥmad retired eastwards, abandoning Delhi to the Mahrattas, and rested for the rainy season of 1760 at Anūpshahr on the Ganges, where he was joined by his allies the Bangash Nawab of Farrukhābād, the Rohilla chief Najibu-d-daula, and the Nawab Vazir of Oudh.¹ In the autumn the Durrānī moved out to resume the struggle, which by this time had assumed the character of a religious war. The Jumna was crossed in the face of the enemy and finally, on the 7th January 1761, a large Mahratta army was destroyed in the decisive battle of Pānipat. This disaster put an end to the dreams of supremacy cherished by

¹ Anūpshahr is a town on the west bank of the Ganges where several roads converge at an important ferry. From 1773 to 1806 Anūpshahr was an outpost of British troops; the garrison was then transferred to Meerut.

the Mahratta race. Aḥmad Shāh reoccupied Delhi but the Afghan troops mutinied and enforced an immediate return to their own country; the Durrānī disappeared from India leaving governors at Sarhind and Lahore. The events of this momentous fifth expedition are reflected in the coinage. There is the little group of mints east of the Jumna. Money was struck at the capital of Hindustan both before and after the battle of Pānīpat; the unique Delhi piece (Pl. III. 14) belongs to the latter period. It is said that after Aḥmad Shāh returned from India crowned with the laurels of Pānīpat, he set himself to build a new capital at Qandahār. But the initial coinage of Aḥmad Shāhī, the Most Noble of Cities, is dated three years before the battle.

During all these changes the Sikhs were growing more numerous and powerful. When the Durrānī retreated through the Panjab with the spoils of Hindustan, he was harassed by the Sikhs and had to abandon much of the heavy baggage including the monster gun named Zamzama; Mirza Taimūr was incompetent to control affairs.¹ Aḥmad Shāh again appeared on the scene and defeated the Sikhs with great slaughter at a place some twenty miles south of Ludhiāna; he did not advance further than Sarhind as he was recalled by disturbances in Afghanistan. These events took place in the spring of A.D. 1762, A.H. 1175. Yet only a year later Zain Khān, the Afghan governor of Sarhind, was defeated and slain by the Sikhs and the town, the hated scene of the immolation of the two sons of Guru Govind Singh, was utterly destroyed.

By this time Aḥmad Shāh's powers were on the wane. A rupee struck in his name at Najībābād by his old ally Najibu-d-daula signifies Aḥmad's last invasion of India in the cold weather of A. D. 1766-7; the Afghan monarch advanced no further than the Sutlej. Lahore had already been lost to the Sikhs but the balance was redressed by a Durrānī advance to the banks of the Oxus. Kashmīr had been annexed in 1762.

Aḥmad Shāh died in October, 1772, A.H. 1186, and was succeeded by Taimūr Shāh. Another son, Mirza Sulaimān, was proclaimed at Qandahār by Aḥmad's Vazir, Shāh Walī Khān; though he was speedily suppressed, money bearing three couplets was issued in the name of this pretender at Aḥmad Shāhī, Pashāwar, Dera, Kābul and Kashmīr. The execution of the Vazir caused great resentment amongst the Durrānīs of Qandahār, so Taimūr Shāh moved his capital to Kābul.² It was his custom to winter at Pashāwar. The

¹ *Panjab Notes and Queries*, 1884. Zamzama is of course mentioned in Rudyard Kipling's *Kim*.

² For these events see *Wāq'āt i Durrānī* (Lith. Ed.), p. 20; *Tārīkh i Aḥmad* (Lith. Ed.), p. 18. Also Ferrier's *History of the Afghans*, London, 1858, pp. 97 f.

Sardār Payanda Khān was given the title of Sarafrāz Khān and confirmed in the command of the powerful Bārakzai section of the Durrānī tribe. Expeditions were sent to Multān and Sind; Balkh was lost towards the end of the reign. Ferrier says that Taimūr Shāh during his reign of twenty years was only twice at the head of his army to meet his enemies, and holds that this was the result of policy; he commends the intelligence and firmness of the king (*op. cit.*, pp. 99, 105). A different verdict was recorded by a shrewd contemporary, Major William Palmer, British agent with Sindia, in a letter written to Warren Hastings from Agra on the 30th December 1789.¹ 'Timoor Shāh is not of a character to undertake foreign conquest, it is with difficulty he can be stimulated to any personal exertion in defence of his own dominions, which are frequently disturbed by his northern neighbours, and the tribute withheld by the conquered provinces on the east. He can therefore have little or no influence on the transactions of Indostan tho' the bugbear of his approach is annually repeated.'

Taimūr Shāh at his death on the 18th May 1793 left twenty-three sons; they were by different mothers, the usual source of weakness under oriental conditions. Zamān and Shujā' were full brothers; they were opposed by Humāyūn and Maḥmūd. The most influential of the Sardārs was Payanda Khān Bārakzai, the father of twenty-two sons. Payanda Khān supported Mirza Zamān. Humāyūn, the eldest son of Taimūr, proclaimed himself at Qandahār but was soon defeated and blinded by Zamān, who was acknowledged king at Kābul. Zamān had to deal with the active and determined enmity of Maḥmūd at Hirāt, who was continually stirring up trouble on the Persian side; the Sikhs were predominant in the Panjab. Faced with failing resources and rebellious brothers Shāh Zamān contemplated the resuscitation of the fast fading glory of the Durrānīs by more invasions of India. There was some chance of success because the Afghan monarch was regarded by the Indian Muslims as the champion of Islam.² Such was the terror inspired by these savage invaders that their presence in Lahore caused a mobilization in distant Oudh.³ Zamān twice invaded the Panjab and occupied Lahore without much opposition but was called back each time by threatening developments

¹ British Museum Library, Warren Hastings Papers, vol. XL.

² As testified, for example, by a letter addressed to Shāh Zamān by the brother of the Nawab of Dacca. *Lord Valentia's Travels*, London, 1811, vol. I, Appendix II.

³ S. C. Hill, *The Life of Claud Martin*, Calcutta, 1901, p. 80. Shāh Zamān in 1798 actually launched an ultimatum upon the Nawab of Oudh and the East India Company; the threat from the Frontier was an appreciable factor in bringing about Lord Wellesley's Treaty with Oudh of the 10th November 1801. A recent competent authority is Mr. P. E. Roberts, *India under Wellesley*, London, 1929, pp. 120 f.

towards Hirāt. His troubles were brought to a head by the impolitic execution of Sardār Pāyanda Khān who had been Vazir to both Aḥmad and Taimūr Shāh. This rash act led to Zamān's defeat, deposition and blinding by Maḥmūd. Now began a fight to a finish between the half brothers Maḥmūd Shāh and Shāh Shujā'. Qaiṣar was a son of Shāh Zamān, and Kāmraṇ of Maḥmūd.

Shujā'u-l-mulk Shāh was obsessed with his kingly birthright; his thoughts seldom strayed from Kābul, Qandahār and his royal prerogative. This indomitable adventurer has left an account of part of his life.¹ Maḥmūd had succeeded Zamān at Kābul on the 25th July A.D. 1801, third month of A.H. 1216; Shujā' was at Pashāwar. In that year Shāh Shujā' at the age of seventeen proclaimed himself king in Pashāwar although he could only command a party of two hundred horse and foot. He must have struck coin for the occasion but no piece can be attributed with certainty to this brief so-called first reign. Maḥmūd was ousted from Kābul two years later and Shāh Shujā' began his second reign in August, 1803, A.H. 1218. Qaiṣar was made governor of Qandahār but rebelled at the instigation of Vazir Faṭḥ Khān, the eldest of the Bārakzai brethren. Four years later Qaiṣar again rebelled at Kābul and marched on Pashāwar; Shujā' advanced from Sind and defeated him in March, 1808. Both revolts were signalized by the issue of coin. Maḥmūd Shāh recovered Kābul in the spring of 1809 and defeated Shāh Shujā' at Nīmīla in August of that year, A.H. 1224. Shujā' fled to Qandahār, then to the Panjab, where he met Ranjit Singh at Sahiwal (Cunn., p. 158). The next few years are occupied with various attempts on Pashāwar. In the cold weather of A.D. 1811–2, A.H. 1227, Shujā' expelled the governor Muḥammad 'Aẓīm Khān Bārakzai from Pashāwar and took up his residence in the citadel; this temporary success was commemorated by the issue of coin. Shujā' was taken prisoner in the spring of 1812 by Jahāndād Khān who sent the captive to his brother 'Aṭā Muḥammad Khān Bāmīzai, governor of Kashmīr; the royal hostage, who had with him the Koh-i-Nūr diamond, was detained in Kashmīr a year. In early 1813 Vazir Faṭḥ Khān conquered Kashmīr and left his brother 'Aẓīm Khān Bārakzai governor in place of the defeated 'Aṭā Muḥammad; Shujā' was sent down to Ranjit Singh at Lahore. It was just at this time that anonymous copper coins dated 1228, first regnal year were struck at Kashmīr (Srinagar) (Coins 1050 and 1051). We are not told that 'Aẓīm proclaimed himself king of Kashmīr; even when the Bārakzais triumphed at Kābul five years later, they struck coin in the name of Sadozai princelings. I

¹ Biographical Sketch of Shah Soojah, ex-King of Cabul, written by himself at Loodianah, in 1826–7. *Calcutta Monthly Journal*, 1839.

think that these pieces embody an assertion of loyalty to Shujā' whom 'Aẓīm had just liberated from the thralldom of 'Aṭā Muḥammad; one coin is called a *sikka*, that is to say, it bears the royal stamp.

The fall of Maḥmūd was the result of the blinding of Vazir Fath Khān Bārakzai early in A.D. 1818. 'Aẓīm Khān, as soon as he heard of the affair, dispatched his younger brother Dost Muḥammad to Kābul; Dost Muḥammad there proclaimed a Sadozai prince Sultān 'Alī as king. 'Aẓīm Khān in person proceeded from Kashmīr to Pashāwar. In the first flush of his resentment he made overtures to Shāh Shujā' and undertook on behalf of the Bārakzai brethren to obey Shujā' as his lawful sovereign. Shāh Shujā' advanced from Ludhiāna, entered Pashāwar and took possession of the citadel; it is probable that Coin 1052 was minted on this occasion. But 'Aẓīm had decided to adopt another Sadozai titular Aiyūb as a more pliable tool; Shāh Shujā' was defeated and once more set out on his wanderings, eventually returning to British hospitality at Ludhiāna. 'Aẓīm Khān with his puppet king Aiyūb took the road to Kābul and the ensuing negotiations with Dost Muḥammad terminated in the acknowledgement of 'Aẓīm as Vazir, and of Aiyūb Shāh as nominal sovereign. Shāh Sultān 'Alī quietly retired into private life, while Shāh Maḥmūd and his son Kāmraṇ were allowed to rule on sufferance at Hirāt.¹ Afghanistan was partitioned amongst the Bārakzais. These events took place in A.D. 1818, A.H. 1233-4, and thus came to an end the power of the Sadozais. The royal line of Ṣado, like that of Taimūr, was honoured with the *khutba* and the *sikka* long after its power had disappeared. 'The Bārakzai chiefs at first made use of princelets of that family as puppets to conciliate any adherents they might still possess but soon were able to dispense with this pretence, and as not one of these titulars was a man of character or ability, they were allowed to sink into obscurity in their own country, or they drifted away to Ludhiāna'.

In June, 1838 was signed the tripartite treaty between Shāh Shujā', Ranjit Singh and the British Government; it was decided to restore the Afghan monarch. In the autumn of the same year a large British force was dispatched from Bengal through Upper Sind towards the Bolan Pass, while troops from Bombay under Sir John Keane were ordered to effect a junction with the main column by way of the western bank of the Indus. Indian soldiers

¹ Charles Masson has a good account of the early career of Dost Muḥammad and of the events which led to the downfall of the Sadozais. C. Masson's *Narrative*, London, 1842, vol. III, Chapters II to IV. Sultān 'Alī was soon murdered. Aiyūb Shāh was more fortunate; he eventually made his way to Lahore and became a pensioner on Ranjit Singh. There is a character sketch of the worthless debauchee Kāmraṇ in Munshi Mohan Lal's *Journal of a Tour through the Panjab, &c.*, Calcutta, 1843, p. 241.

were seen again in southern Afghanistan after the lapse of two centuries. Qandahār and Ghazni fell in turn and the state entry into Kābul took place on the 7th August 1839, A.H. 1255. Dost Muḥammad made good his flight north of the Hindu Kush. The rest of the story is well known. The high command was incapacitated by blundering interference, insurrection was allowed to come to a head, and a British force was destroyed on its retreat from Kābul; Shāh Shujā' was murdered three months later. These events took place in the beginning of A.D. 1842, A.H. 1258. The 'army of retribution' placed Faṭḥ Jang, son of Shujā', on the throne, but on the departure of the British troops Faṭḥ Jang was wise enough to withdraw; he abandoned Kābul in October, 1842. Dost Muḥammad found his way back and quickly recovered his influence and authority.

One episode in the late Durrānī period requires separate treatment. Coins were struck at Kashmīr from A.H. 1223 to 1228 bearing the name of Shāh Nūru-d-dīn; Shāh is a common appellation for a Muslim *faqīr* and it is clear from the invocation that Nūru-d-dīn was a saint or holy man. Mr. Rodgers merely recorded that the Afghan governors of Kashmīr issued money in the name of the saint Nūru-d-dīn. Mr. Longworth Dames says that Kashmīr had become a perfect hotbed of rebels and pretenders: 'after Qaisar Shāh, the governors Nūru-d-dīn and Muḥammad Shāh struck in their own names'. Later Mr. Dames correctly stated that coins issued in the name of the popular saint Nūru-d-dīn, but repeated the misapprehension arising from the alleged Kashmīr coins of 'Muḥammad Shāh'.¹ The Nūru-d-dīn money was issued by 'Aṭā Muḥammad Khān Bāmīzai, grandson of Shāh Walī Khān, Vazir to Aḥmad Shāh, who was appointed governor of Kashmīr in place of 'Abdullah Khān Alakozai by Shāh Shujā' at the end of the year A.H. 1219.² 'Aṭā Muḥammad rebelled in the latter half of 1223 and an expedition sent against him under the Vazir Akram Khān was a complete failure. This news reached Pashāwar, the winter capital of Shujā', in the second month of 1224 or April, 1809, just about the time that Maḥmūd Shāh recovered Kābul. Civil war followed and Shujā' was defeated at Nīmīla in August, 1809. Maḥmūd became king for the second time with Faṭḥ Khān Bārakzai as Vazir. Four years later Faṭḥ Khān marched into Kashmīr and defeated 'Aṭā Muḥammad in

¹ See *Encyclopaedia of Islam*, 'Kashmīr', p. 794. The name Muḥammad Shāh is due to an error which I explain in the Mint Note on Kashmīr.

² Alakozai, like Popalzai, is a Durrānī tribe. Both Sadozai and Bāmīzai are septs of the Popalzai. R. C. Temple, *Distribution of the Afghan Tribes about Qandahar*, J.A.S.B., 1879.

the second month of 1228, or February, 1813; the Vazir left his brother 'Aẓīm Khān to rule Kashmīr. It is clear that 'Aṭā Muḥammad had made himself independent of Kābul because Shāh Shujā' and Maḥmūd Shāh in turn sent expeditions against him; the period is A.H. 1223 to 1228, precisely that of the Nūru-d-dīn coinage. 'Aṭā Muḥammad would not assume royal honours; he certainly did not wish to acknowledge either Shujā' or Maḥmūd. By way of compromise he struck coin in the name of Shaikh Nūru-d-dīn, the patron saint of rural Kashmīr.¹ The special nature of the occasion is marked by the issue of a handsome silver coin weighing 224 grains, the only piece of this weight in the entire Durrānī series; fine double mohurs of a unique character were struck later.

§ 2. INSCRIPTIONS

The legends on the gold and silver issues of the Durrānīs are generally alike. The obverse contains a Persian couplet of an allusive nature; often, following Indian practice, there is the Hijri date. The reverse exhibits the mint and regnal date, sometimes accompanied by the Mughal formula *sana julūs maimanat mānūs*, Year of Accession associated with Prosperity. Only two rupees, both of Aiyūb Shāh, bear the Kalima, the Muḥammadan Profession of Faith. The copper coins have the royal name and titles, the mint, and date. There is nothing on the mohur or the rupee to denote the denomination; copper currency is merely called *فلوس*, a vague term meaning 'copper money'. The only exception to this statement is provided by the copper issue of Aḥmad Shāh which bears the words *وزن خام رائج الوقت*. Neither *laqab* (surname) nor *kuniyat* (patronymic) is found on Durrānī issues except the Kashmīr money of Shāh Nūru-d-dīn. Very few Marks are mint marks in the sense of recurrence through a period of years on the issues of a particular mint. Marks 8 and 22 of Multān mint originated in the reign of Aurangzeb; 48 is characteristic of Bahāwalpūr, and 11 is the lily of Dera. Mark 2 often occurs on the money of Pashāwar, and Kashmīr may be indicated on copper pieces by a sword or crossed swords.

Attention is drawn in the Mint Notes to the frequent aberrations of regnal date exhibited by the coins of the later Durrānīs. The

¹ *The Valley of Kashmir*, W. R. (now Sir Walter) Lawrence, London, 1895, p. 287. The atrocious nature of the Afghan domination is indicated at p. 197. 'Aṭā Muḥammad on his return to Afghanistan joined Prince Kāmran and made a bold bid for power in the commotions which followed the removal of Vazir Faṭḥ Khān Bārakzai. He was quickly outwitted and blinded, a typical Afghan episode (C. Masson, *op. cit.*, vol. III, p. 44).

puzzle of the early Multān issues of Taimūr Shāh is explained by the fact that the Sikhs were in possession just at that time. The second year of Maḥmūd's second reign is 1224 at Kābul, 1226 at Pashāwar, while at Multān the first year is 1227. The power of the Durrānis was collapsing and their empire was filled with treachery and bloodshed; the times were out of joint and mint masters were liable to lose their heads in more senses than one. In so disturbed a period, the coins cannot be expected to conform with a general scheme of regnal years.

A reference is invited to the Catalogue where the coin couplets are set out and translated as they occur. The couplets bear a family resemblance to those of India and Iran; they are more elaborate than the Mughal inscriptions. Nādir Shāh does not appear to have used the Ṣāhibqirān distich before his invasion of India. This horoscopic title was probably inspired by his overthrow of the race of Tamerlane who was the Ṣāhibqirān *par excellence*, though it had already been used by Nādir's predecessor 'Abbās III (R.S.P., p. 69).

The usual distich of Nādir Shāh is a recital of the titles already given on p. xxii. There is an adequate notice in the Mint Notes of the ephemeral Murshidābād issue with a recently published couplet. The type with Nādir the Sultān on the obverse originated in Persia. The 'Aẓīmābād (Patna) rupee is just the normal money of Muḥammad Shāh but Nādir has been substituted for the name of the Mughal. Coin 57 appears to be of Indian mintage and is of unique character. The usual reverse legend is the invocation خلد الله ملكه, 'May God perpetuate his Kingdom', together with the mint and Hijri year but not the regnal date.

The great Aḥmad Shāh remained faithful to one couplet throughout his reign of twenty-five years.¹ Mr. Rodgers' version of the order which proceeded from the Incomparable Creator is 'Strike coin on silver and gold from the Ascension of Pisces to the Moon', translated from the Latin of Marsden. A similar literary trifle occurs in 'Utbi's Kitāb i Yamīnī where it is said of the fort of Bābātiḥ that 'its top was equal in loftiness to Heaven's height and was parallel to Pisces'. A line in the poetry on Ḥasanābād runs عمارت برآورد براوج ماه (Firishta). The expression is treated by E. G. Browne in his *Literary History of the Persians*, vol. III, p. 113. ماهی is the cosmic Fish; the metaphor is one of universality, both of beauty and location. The couplet is arranged in either three or four lines; the form باحمد is sometimes written به احد. The word د occurs instead of ز on early issues of the Bhakhar mint. When Aḥmad Shāh entered the

¹ The rupee *C.J.R.*, 1894, p. 167, No. 1 belongs to the Mughal Aḥmad (*J.A.S.B.*, 1910, p. 670).

Panjab for the last time, he gave the new Sarhind to the Patiala chief Amar Singh and permitted the use of his coin couplet. This Durrānī couplet appears on the modern money of Patiala, Jind and Maler Kotla States.

The coinage of Taimūr as his father's Nizām is monotonous; the couplet is always in three lines. He is already called Shāh and has his own scheme of regnal dates. Sulaimān's brief bid for power is enlivened by three couplets; the Kashmīr couplet will be completed when additional specimens come to light. The tedious distich of Taimūr Shāh embodies the conceit of a revolving sky, alternate day and night, sun and moon, gold and silver, all obedient to the Shāh's command. This legend is arranged in many ways but, for reasons of economy, only a few are reproduced in the Catalogue. The word كند is replaced by اند; on the money of Kashmīr. Non-couplet piece 494 is unique.

The claimant Humāyūn approved an elaborate couplet which I cannot elucidate. Shāh Zamān used one couplet in the first half and another in the second half of the reign; on some coins there is an effective arrangement of both couplets. In the second distich the name of the king appears as Zamān Shāh. A form of the first couplet was used at Multān in which the word تار is replaced by تار.¹ The Aḥmad Shāhī piece Pl. IX. 5, is a beautiful coin; the arrangement of the mint legend is characteristic of Durrānī money at its best. The expression Right and Left Hand (of the State) is unusual. Possibly a third couplet appears on Coin 759.

Mahmūd Shāh employs the same couplet on the issues of his first reign and on the abundant silver money struck at Hirāt for thirty years. The distich has affinities with those of the Shāhs of Persia. No couplet can be ascribed with certainty to what is called the first reign of Shāh Shujā'. The normal distich of the second reign is on conventional lines; the Kashmīr couplet is that of the Mughal emperor Farrukhsiyar. Handsome double and single rupees were struck at Bahāwalpūr with a special couplet of the Persian type. I attribute a unique piece (Coin 1052), with a distich so far unread, to a temporary revival of authority at the Shāh's favourite residence Pashāwar (p. xxviii). The rebel Qaiṣar Shāh, like Sulaimān, had three couplets. There is a close resemblance between those of the Qandahār (Aḥmad Shāhī) and Kashmīr mints, the second line being common to both. The Kābul rupee of Qaiṣar, like the Kashmīr coin of Sulaimān, is a solitary specimen.

¹ The *Tārīkh i Aḥmad*, of which the *Daulat i Durrāniya* is an Urdu translation, gives this coin couplet, also that of Taimūr as found on the money of Kashmīr. This chronicle also tells us that Humāyūn had the *khutba* read and money issued in his own name at Qandahār, but unfortunately the couplet is not given.

There are two couplets used in the second reign of Maḥmūd Shāh, that of his first reign and the second of a Persian complexion in which the king is called by a Shī'a title, the Second Ḥasan. The distich of Shāh Nūru-d-din is discussed in the Catalogue. Two couplets were invented for the puppet king Aiyūb; that of Kashmīr contains a punning allusion to Aiyūb's protector Sardār 'Aẓīm Khān Bārakzai. The distich of Kāmṛān Shāh is another couplet partially read; further material is required.

Dost Muḥammad Bārakzai was dethroned and Shāh Shujā' restored at Kābul by British arms. There is a couplet type of the third reign of Shāh Shujā'; the first line is identical with that of the couplet quoted by Mr. C. J. Rodgers from the Tārīkh i Sultānī (L. D., p. 338). The titular Faṭḥ Jang is the last of the Sadozais. He appears to have struck a couplet issue (Pl. XIV. 16), but the coin listed exhibits only a part of the legend. I do not know of another specimen.

§ 3. WEIGHTS.

I have incorporated information about weights and standards in the Mint Notes. Only eight of the catalogued coins are on the Persian standard, three silver of Nādir, four gold and one silver of the Durrānis. Dr. R. Stuart Poole has reproduced the careful Tables of Hanway (R. S. P., pp. lxi f.); he remarked that Nādir's currency includes two unrecorded denominations, the double mohur and the double rupee. Doubtless Jonas Hanway never saw them because they were minted in Khurāsān and outside Persia. The only recorded double mohur was struck at Lahore, the double rupees at Qandahār, Pashāwar, Multān, Lahore and Meshed.¹ These double pieces are of Indian weight. The smaller silver coins struck at Qandahār and Nādirābād tally with Hanway's six shāhī piece of 108 grains. All the other coins of Nādir in this Catalogue are on the Indian standard. Coin 3 of Aḥmad Shāh, the initial gold issue of his new capital Aḥmad Shāhī, is an ashrafi of the Persian denomination. Three other gold coins of Aḥmad Shāhī mint in my list are of Persian weight. Coin 930 of Maḥmūd's first reign weighs 54 grains, the equivalent of the old ashrafi. Coin 974 of the second reign of Shujā' is an ashrafi weighing 47 grains; 1058 of Maḥmūd's second reign only weighs 37.5 grains. The unique thin silver piece of Aḥmad (Coin 172) weighs 62 grains.

The Indian term for the normal weight gold coin of the 168 grain standard is ashrafi or mukh (*Angl.* mohur); the corresponding piece

¹ For double rupees of Meshed see the White King Sale Catalogue.

in silver of the 178 grain standard is the *rupiya* (*Angl.* rupee).¹ Afghanistan was flooded with Indian gold and silver, the hoards of centuries, and the coins are usually of remarkably good metal and full weight. Only in the last years of Maḥmūd Shāh at Hirāt, when the Durrānī empire had already fallen, did base metal and small silver appear in Afghanistan. Conditions were of course different in Multān and Kashmīr, where we find comparatively abundant copper issues. Fractions of the Indian weight gold are unknown; fractions of the rupee are extremely rare outside late Kashmīr and Hirāt. There was not a single small silver piece at Bahāwalpūr; my only prize in this line was a half rupee of Shāh Zamān of Kābul mint (Coin 815). Coin 109 appears to be a tenth of the rupee.

The Mint Notes contain detailed information about weights. Gold coins of Indian weight are minted to the standard of 168 grains throughout the dynasty. There is a solitary silver piece of the curious weight of 224 grains (Coin 1176). Early silver issues at most mints are on the full standard of 178 grains but deteriorate in weight later. Hirāt silver maintains its weight fairly well till Kāmran's time; on the other hand, Derajāt and Kashmīr rupees are on a scale of about 170 grains throughout. A critical date is the sixth or seventh year of the second reign of Maḥmūd; the silver standard at Aḥmad Shāhī, Pashāwar and Kābul drops from the full weight to about 165 grains. At Bhakhar the weight was maintained till the Afghans were ousted by the Mirs of Khairpūr about the year A.H. 1255. Coin 1218 is a full weight Kābul rupee of the third reign of Shāh Shujā'; it is exceptional in this respect because the other silver coins of this reign struck at Aḥmad Shāhī and Kābul are on a standard of some 145 grains. Mr. Longworth Dames calls this the depreciated Bārakzai standard which, according to Dr. White King, was largely in use all over the North West Frontier at the end of the nineteenth century. Durrānī rupees were still more or less in circulation in the north west Panjab after the Mutiny.²

There was little attempt to strike copper money on a uniform scale; the weights vary with local custom and demand. Copper issues of Aḥmad Shāh correspond roughly with the *dām* of 320 grains, a Later Mughal standard of some 285 grains (as exemplified in Muḥammad Shāh's money of Bhakhar, Elichpūr and Kashmīr) and Aurangzeb's depreciated *dām* of about 215 grains. A favourite weight for Multān copper throughout is some 180 grains; the denomination is lighter in

¹ I think 170 and 180 grains rather high; the definition of the *tola* at just 180 grains belongs to the British period. W. H. Moreland, *Indian Antiquary*, Sept. 1931, p. 161.

² 'Table of the Coins of former Governments more or less current in the Bazars of the Goojrat District in 1859', *J.A.S.B.*, 1864.

Kashmīr. Pieces struck by Maḥmūd and Shujā' in Kashmīr centre round 120 and 65 grains.

Two *fulūs* of Aḥmad Shāh in the British Museum are called وزن خام رائج الوقت; there are two more at Berlin. A *khām* or *kachcha* weight is local as distinguished from imperial; these interesting pieces are local weights current at the time of striking, the years 1175 and 1176 respectively. Unfortunately the coins are in poor condition; their weights are 181 and 160 grains. The locality or mint is not given but *fulūs* of this type were struck only at Bhakhar and Dera. The Mughal official maund and *ser* had been based on the weight of a coin, the copper *dām*. In the present case the local *ser* was probably the equivalent of a certain number of copper pieces and the coin under discussion is the local unit of weight.

§ 4. MINT NOTES.

The coins of Nādir Shāh and the Durrānīs of Persian mintage, and anonymous money in general, are omitted. Aḥmad Shāh conquered Khurāsān in A.D. 1748 to 1750 and his son and successor Taimūr Shāh was born at Mashhad (Meshed). Both Aḥmad and Taimūr struck at Mashhad; these issues are represented in the British Museum. Khūī, خوی, is recorded as a mint of Taimūr Shāh on the sole authority of E. Leggett.¹ The place is in western Persia, far outside Taimūr's sphere of influence. The only anonymous pieces listed are copper coins 1050 and 1051, but they exhibit both Hijri and regnal dates.

The totals as given at the beginning of each Mint Note are those from all sources. The pieces actually in the Panjab Museum itself can only be ascertained by reference to the Catalogue proper.

The mints are twenty-seven in number. There are the modern mints of Bahāwalpūr and Aḥmadpūr, and the Camp mint Rikāb which corresponds with the imperial Urdū of the Mughal emperors of Hindustan. The Mughals had struck coin at all the others except Hirāt which was a Persian town till seized by Aḥmad Shāh. Taimūr Shāh issued money at Balkh in Afghan Turkistān, a mint of Shāh Jahān; Qandahār and Kābul are the principal cities of Afghanistan. Kashmīr was taken from the Mughals by Aḥmad Shāh. Bhakhar, Pashāwar, Tatta, Dera, Derajāt and Sind (Haidarābād) are in the territory which was ceded to Nādir Shāh; Atak, Lahore and Multān in the Panjab. Sarhind (Sahrind) stands where Hindustan and the Panjab meet. The remaining nine mints are in Hindustan and the coins commemorate the invasions of India. Both Nādir and Aḥmad issued money at Delhi; the terrified Mughal

¹ *Notes on the Mint Towns and Coins of the Mohamedans*, London, 1885.

officials struck coins in the name of Nādir Shāh at distant Aḥmadābād, Patna (ʿAẓīmābād) and Murshidābād. There are five mints of Aḥmad Shāh east of the River Jumna: Ānwala, Bareli, Farrukhābād, Murādābād and Najibābād. They are the towns of Aḥmad's Muslim allies at the battle of Pānipat.

Half the mints bear honorific epithets. Balkh is the Mother of Cities, Bahāwalpūr the Abode of Pleasure, while Haidarābād in Sind is of Auspicious Foundation. The Camp mint Rikāb is called August or Fortunate, Sarhind is the Seat of Safety, Kashmīr and Hirāt the Resting Place of the Sultanate and Qandahār (Aḥmad Shāhī) the Noblest of Cities. The mountain State is also called the Territory of Kashmīr. Five mints keep the epithets bestowed upon them in happier times. The Mughal capital Shāhjahanābād (Delhi) is the Seat of the Khalifate, Multān the Abode of Security and Farrukhābād in its eponymous form Aḥmadnagar commemorates the Bangash Nawab Aḥmad Khān who fought at Pānipat. Lahore remains the Seat of the Sultanate. Kābul on the earliest Durrānī coins is called by its Mughal title Abode of Royalty but quickly becomes another Seat of the Sultanate.

It was my intention to omit autonomous coins (pp. xi and xxxv). However at the end of the Catalogue there is a list of these local copper issues from Afghan mints bearing dates which bring them within the period of Durrānī supremacy. Mr. Longworth Dames has included Dera Fath Khān in his list of mints though the so-called 'cat money' is clearly of a local character.¹ His Coin 54 bears the name Taimūr but there is no certain attribution to Dera Fath. Coin 2784 of the White King Sale Catalogue claims to be a Nādir rupee of Dera Fath mint. Dr. White King's Durrānī series, with others, left this country, and it would now be difficult to verify the legends of any particular piece, so I have confined Dera Fath Khān to the autonomous list. Shikārpūr is a mint of the Amirs of Sind. It is represented by a copper piece of year A.H. 1255 (W.K. 2879) struck in the name of Maḥmūd Shāh ten years after his death and twenty-two years after the fall of the Sadozais.

ATAK اٹک

	Lat. 33° 53'	Long. 72° 16'	
	G.	S.	C.
Aḥmad	2	10	—
Taimūr	1	12	—

Atak (Attock) is the well-known fortified post on the east bank

of the Indus, the river which the orthodox Hindu could not cross. The fort was built by the emperor Akbar who struck copper money at Atak Banāras. After Akbar, Atak is represented in the Mughal series by one or two rupees of Muḥammad Shāh.

The north west Panjab was annexed by Aḥmad Shāh Durrānī in A.H. 1165. The rare mint Atak is well represented in the list by gold and silver money of Aḥmad and Taimūr Shāh of normal types and full weight. The latest piece catalogued is of Taimūr's sixteenth year. Subsequently Atak fell to the rising power of the Sikhs.

AḤMADĀBĀD احمدآباد

Lat. 23° 1' Long. 72° 38'

	G.	S.	C.
Nādir	—	2	—

Aḥmadābād, the capital of the Province of Gujarāt, was a splendid city and a prominent mint in the heyday of the Mughal empire. As Nādir Shāh never advanced beyond Delhi, it may well be asked why money should have been struck in the name of the conqueror at a place so remote from the invaded territory. There can be little doubt that, as at Murshidābād, a demand was made for recognition and for tribute and that the Mughal governor did not dare to refuse. Only three or four coins are known, all in silver and of year 1152; Dr. White King had a half rupee. These pieces bear the normal couplet.

AḤMADPŪR احمدپور

Lat. 28° 18' Long. 70° 7'

	G.	S.	C.
Maḥmūd. Second reign or posthumous	—	4	—

Aḥmadpūr is an old capital of the Bahāwalpūr State. Rupees of an inferior type, probably posthumous, were struck at Aḥmadpūr in the name of Maḥmūd Shāh.

ĀNWALA (AONLA) انولہ

Lat. 28° 16' Long. 79° 12'

	G.	S.	C.
Aḥmad	—	5	—

Aonla is a town in Rohilkhand. Rupees dated 1173 and 1174 were struck here in the name of Aḥmad Shāh by his ally Najibu-d-ḍaula. Mahratta successes in the Panjab brought the Durrānī into India for

the fifth time. Shāh 'Ālam II had just ascended the Mughal throne but was powerless to influence events. Aḥmad Shāh marched on Delhi by a circuitous route and took it from the Mahrattas in the spring of A.D. 1760, equivalent to A.H. 1173, 14. The unhappy capital and its vicinity had been so devastated that Aḥmad decided to cross the Jumna and to pass the rainy season at Anūpshahr, an important post on the Ganges, now in the Bulandshahr District of the United Provinces. He was joined by the Bangash Nawab of Farrukhābād, the Rohilla chief Najibu-d-daula, and Shujā'u-d-daula, the Nawab Vazir of Oudh. The Mahrattas recovered Delhi, but Aḥmad Shāh with his allies crossed the Jumna at the end of October, 1760 and totally defeated a large Mahratta army at Pānīpat on the 7th January, 1761 or A.H. 1174. The Durrānī left Delhi for Afghanistan at the end of March, 1761. During this invasion money was struck by his allies in the name of the Afghan conqueror at the mints of Aonla, Bareli, Farrukhābād, and Murādābād. Aonla rupees are listed countermarked with dates 1188 and 1191; Aḥmad Shāh died in 1186.

BARELĪ بریلی

Lat. 28° 22' Long. 79° 26'

	G.	S.	C.
Aḥmad	—	2	—

Bareli is the principal town of Rohilkhand. Rupees dated 1173 and 1174 were struck here in the name of Aḥmad Shāh by his ally Najibu-d-daula. A reference is invited to the collective Note under Aonla.

BALKH بلخ

Lat. 36° 36' Long. 67° 10'

	G.	S.	C.
Taimūr	—	2	4

Balkh in Afghan Turkistān, once the capital of ancient Bactria, was a mint of Shāh Jahān. In A.D. 1764–5 Aḥmad Shāh Durrānī conducted a campaign against the Amir of Bukhāra and the Oxus was fixed as the boundary between the two States. Taimūr Shāh struck silver coins at the Mother of Cities, as Balkh was called; copper pieces are listed of dates A.H. 1202, 1205, and 1206. Copper coins of what appear to be the first two dates were published at p. 387 of C. M. Fraehn's *Opusculorum Postumorum, Pars Prima*, Petropoli, 1855. Balkh was recovered by the Uzbegs in or about the year A.H. 1206.

BAHĀWALPŪR بہاولپور

Lat. 29° 24'

Long. 71° 47'

		G.	S.	C.
Maḥmūd.	First reign	5	7	—
Shujā'	Second reign	3	10	—
Maḥmūd.	Second reign	1	13	—

There is a notice of Bahāwalpūr in the Preface; it was a succession State of the Mughal empire. Bahāwalpūr town possessed some commercial importance. Imports for Hindustan were conveyed in camel caravans from Kābul to Delhi by way of Multān, Bahāwalpūr, Sūrātgarh and Bhatner; if intended for Sind, they diverged south from Bahāwalpūr.¹ In the year A.D. 1788 Taimūr Shāh in person subdued the Nawab of Bahāwalpūr and the desert stronghold of Derāwar was taken after a three months' siege. The Nawab paid an indemnity and agreed to remit a yearly tribute to Kābul. Bahāwalpūr came early into contact with the British; the Political Mission under Mountstuart Elphinstone halted here in December, 1808 on its way to Pashāwar. Durrānī suzerainty ceased with the fall of Maḥmūd Shāh in 1818. The State was an active ally of the British in the First Afghan War.

Gold and silver coins were struck at Bahāwalpūr in both reigns of Maḥmūd Shāh and in the second reign of Shāh Shujā'; these pieces usually exhibit a rough oblique milling, a tribute to British influence. I saw some thousands of handsome double pieces in both metals; they had never been in circulation. The mint opened in the year 1217 of Maḥmūd's first reign with double and single pieces in gold, the edge being obliquely milled.² I found only two unmilled specimens out of many hundred double mohurs like 932; Pl. X. 7 is one of the two and was in my Cabinet. The initial silver issue is unmilled and bears the name of the mint attended by an epithet *Dāru-s-surūr*, Abode of Pleasure (Pl. X. 8). At the beginning of the second reign of Shujā', double and single pieces were struck in silver with a special couplet. There are no double pieces of the second reign of Maḥmūd Shāh. The issue of inferior silver coin continues in the name of Maḥmūd not only after his deposition in A.H. 1233, but also after his decease in the year 1245.

¹ On Tabular Returns of the N. W. Frontier Trade with Afghanistan. *J.A.S.B.*, 1841, pp. 251, 484.

² The milling is coarse and seems to have been done by hand after the coins had left the dies.

These coins of Maḥmūd are succeeded by autonomous silver coins of Bahāwalpūr State. The legends are: *Sikka i mubārak Dāru-l-Islām*, and the Hijri date: *Zarb Dāru-s-surūr Bahāwalpūr*. An early date in the Indian Museum is 1251.

and posthumous			

Planted in mid-stream between Sakhar (Sukkur) and Rohri is the island-stronghold of Bhakhar; it is one of the few pretty spots on the Indus and in old days was the key of Sind. Bhakhar was founded in early Muhammadan times and played an important part in the history of the Province. In Akbar's reign it was a *sarkār* in the *ṣūba* of Multān. Sind was ceded to Nādir Shāh. The Persian conqueror after his return from Delhi stayed in Kābul only six days. Then, sending his treasure to Hirāt, he went to Sind by way of *Bangash* and the Deraḥāt in order to compel the surrender of the governor of Bhakhar. Nādir arrived in Dera Ghāzi Khān on the 15th Shawwāl, 1152; he left Lārkāna on his return from Sind in the first month of the year 1153.

The gold and silver pieces of Nādir Shāh struck at Bhakhar mint are couplet coins of the full imperial Indian weight. Bhakhar gold of Nādir is very rare; I note two dates only, 1155 and 1158. Silver is comparatively abundant and the sequence of years from 1153 to 1160 inclusive is complete. Bhakhar is the only Indian mint at which Nādir struck copper money of the *fulūs* type. There is a copper coin of Muḥammad Shāh in the British Museum dated 1160 which points to a temporary revival of Mughal influence at Bhakhar on the death of Nādir.

Gold coins of Aḥmad are very scarce, indeed gold was sparingly struck at Bhakhar throughout the dynasty. I give two examples, both from the Bahāwalpūr Toshakhāna. The first is of the normal couplet type, dates 1168, 8; the second has احمد شاه دُر دُران in a central area

surrounded by the couplet, date 1177. There is a full and interesting sequence of rupees. The earliest coin is a dumpy piece of year three with an unusual arrangement of the couplet in which د replaces the normal زن; the Hijri date being in small figures on the extreme right is generally off the *flan*. Standard pieces of the seventh and eighth years are replaced in the latter year by a central area type; the couplet is arranged around a foliated closed figure containing the words احمد شاه در دران, Aḥmad Shāh, Pearl of Pearls. This effective type of the eighth year was also adopted by the mints of Dera, Derajāt, Kābul and Multān. In the case of Bhakhar mint it continues with variations of the reverse legend till the end of the reign, the latest example listed being of year 1184. Gold and silver throughout are of the full imperial Indian weight. Copper coin 262 is a heavy piece resembling the Mughal *dām*; the other examples approximate to the Later Mughal standards of about 285 and 215 grains.

The Bhakhar mint is found on the coins of Taimūr, first as Nizām or governor for his father Aḥmad, and subsequently as king in succession to Aḥmad Shāh. Gold coins of Taimūr Shāh Nizām from Bhakhar have yet to be found. In some years the rupees of Aḥmad as king and of his son as governor overlap. On coins of Dera, Lahore and Multān mints, 1170 is called the first year of the Nizāmat yet at Bhakhar 1173 is the second year and 1177-78 is the third year. Perhaps the governorship at Bhakhar was one of broken periods; Aḥmad himself struck there in 1174 and 1175. Nizāmat rupees of Bhakhar mint appear in each year from 1182 to 1186 inclusive, of a type without regnal date.

Gold coins of Taimūr Shāh as king are extremely rare. I give three examples, two from the Bahāwalpūr Toshakhāna and the third in the British Museum (from my Cabinet). The last belongs to a late and inferior type with the mint name written Bakhar at the top of the coin. Silver is abundant and I list an excellent series, almost every year of the reign being represented. The first year reverse type is the same as that of years 1182 and 1183 of the Nizāmat. Speaking generally, the obverse is of a central area kind, the last three words of the couplet being surrounded by the remainder. In the year 1195 there is a change, the last two words only—تیمور شاه—of the couplet remaining in the central area, and this obverse type continues to the end of the reign. In certain years the couplet is presented in its conventional four line form. There is no fixed model for the reverse legend, but the Hijri year invariably appears on this side and the regnal date is not given. The type changes in an arbitrary fashion; the list contains four different items for each of the years 1196 and 1197. The weight throughout remains well up to the theoretical

maximum of 178 grains. A few copper coins are known of Bhakhar mint and appear to have been struck to a standard of 250 grains.

In my Notes I find a reference to one gold coin of Shāh Zamān from this mint. It is at Bahāwalpūr; the mint name is written Bakhar. Silver coin 759 is unique, and remarkable in two ways. I do not know of any other coin of Zamān of a central area type; also the legend is different from the two known couplets of Shāh Zamān but cannot be read without the aid of other specimens. Items 760 and 761 exhibit the inferior Bakhar reverse derived from the Taimūr type (Pl. V. 14). I catalogue one copper coin of Shāh Zamān on which the mint name is written Bhakkar.

Silver coin 949 is of the Bakhar type; I attribute it, though dateless, to Maḥmūd's first reign because the legends are about as good as the inscriptions on similar coins of Shāh Zamān, and better than those of certain coins which I have placed in Maḥmūd's second reign.

Both silver and copper are known of Shujā'u-l-mulk Shāh's second reign. The former are again of the Bakhar type; 995 bears date 1218. A few Bhakhar copper pieces exist like 1038.

As regards Maḥmūd's second reign, silver coin 1078, like 949, is of the Bakhar type, but the obverse legend is differently arranged, the style is debased and the Hijri year appears at the top of the obverse. The central area rupee dated 1245 was struck in the year of Maḥmūd's death and is full weight. Its successors of 1255 and subsequent years are light pieces weighing 152 or 153 grains, and must have been coined by the Mirs of Khairpūr who captured Bhakhar from the Afghans. The first issue of 1258 exhibits a bird, peafowl or pigeon, on the obverse, while the reverse bears a peafowl with a cobra in its beak. Other coins of the same year have a hare on the obverse. This hare again appears on issues of 1259 and 1261, corresponding with A.D. 1843 and 1845, but on the reverse is a lion. Sir Charles Napier had arrived in Sind, and Bhakhar with other places was ceded by a treaty signed in February, 1843. The battle of Miāni was fought on the 17th February of that year and Sind became a Province of British India.

PASHĀWAR پشاور

Lat. 34° 0' Long. 71° 38'

	G.	S.	C.
Nādir	4	7	1
Aḥmad	2	20	1
Sulaimān	—	1	—
Taimūr Shāh	9	24	7
Zamān	3	18	—
Maḥmūd. First reign	—	3	—
Shujā'. Second reign	—	10	—
Maḥmūd. Second reign	—	11	1
Aiyūb	2	12	2

The ancient frontier city of Pashāwar was the winter capital of the Durrānīs and the favourite residence of Shāh Shujā'. Nādir Shāh on his way to India took Pashāwar from the Mughals in October, A.D. 1738, A.H. 1151. Coins of Muḥammad Shāh are known of this year (*P. M. Cat.*, p. 330). The only Nādir pieces of this mint dated 1151 seem to be the double rupee in the Cabinet de France of the نادر السلطان type and W. K. 2780. The earliest listed specimen of Indian type is dated 1153 and there are examples in either gold or silver of each year till 1160, with the exception of 1156; they are of the full Indian weight. Coin 66 is a solitary piece in copper of date 1160; it formerly belonged to Mr. Longworth Dames. The mint name is written پشاور, not پیمشاور, and appears in this form on the Durrānī issues.

The coins of Aḥmad Shāh are on the Mughal model; their style is neat and effective and the legends are well centred. The coin illustrated at Pl. III, 9 is a fractional piece and appears to be a tenth of the rupee. Copper money is known which by legend and regnal year might belong either to the Mughal Aḥmad Shāh Bahādur or to the Durrānī Aḥmad Shāh. In my Panjab Museum Catalogue I attributed them to the Mughal (*P. M. Cat.*, p. 361) but Pashāwar was ceded by Muḥammad Shāh to Nādir Shāh and belonged to the Durrānī empire.

Coin 345 is a unique rupee of the pretender Sulaimān; I found it at Bahāwalpūr.

The gold and silver issues of Taimūr Shāh continue in the style of Aḥmad and Sulaimān till and including the seventeenth year. From 1197 to 1199 there are aberrations of regnal year. In year 18 the four line arrangement of the couplet is replaced by one in three lines and the reverse inscription appears in a characteristic flowing

style (Pl. V. 16). The latter is differently arranged in year 19 (Pl. VII. 2) and so remains till the end of the reign. A posthumous specimen in gold is dated 1209, 21. All these coins are well struck and of full weight. The Catalogue describes several copper coins. Specimens of years 1, 4 and 8 are of the Later Mughal model in legend and weight. On other coins of lighter weight the reverse inscription surrounds a lobed figure.

The reverse of Taimūr's latest Pashāwar currency is found on the gold and silver coins of Shāh Zamān. Zamān's first couplet is used till the fourth year—1211 and 1212. It is displaced by the second couplet in year 4. In 1215, 8 appears a type on which the first couplet is surrounded by the second; this is also found of dates 1215, 9 and 1216, 9. All these coins are of remarkably full weight. I am not acquainted with a Pashāwar issue of Zamān in copper.

Rupees are listed of all three years of Maḥmūd's first reign—1216, 1217 and 1218. The reverse of the first year is that of Shāh Zamān's currency (Pl. X, 9) but something quite different appears in the second year (Pl. X, 11); the words *julūs maimanat mānūs* are dropped. I have not found a copper coin which can be attributed with certainty to Maḥmūd's first reign. It is safer to place the piece illustrated at Pl. X, 17 in the second reign because a specimen in the British Museum is dated 123—.

The Pashāwar rupees of Shāh Shujā' are discussed in the Introduction. All are well struck, of good metal and full weight. The Pashāwar rupees of Maḥmūd's second reign are handsome coins bearing the *حسن دیگر* couplet. The list shows that these are full weight till year 4; from year 6 the standard is about 165 grains. In year 8 appears a central area type of obverse; the area contains سلطان محمود and the Hijri date and the remainder of the couplet is arranged in the four marginal compartments. The latest coin is dated 1233, 10.

In 1233 Aiyūb Shāh, a son of Taimūr Shāh, was proclaimed king at Pashāwar by the Bārakzai chief Muḥammad 'Aẓīm Khān, elder brother of Dost Muḥammad. Coins of all three metals were struck in the name of this puppet king. The gold pieces are of poor metal and light weight, a great contrast with the lordly money of the opulent past. There is an interesting series of rupees bearing regnal dates from 1 to 12; the couplet is exhibited in different ways. Copper coins are procurable; a piece similar to 1203 was published by Colonel von Zambaur in the *Numismatische Zeitschrift*, 1904.

Pashāwar was taken by the Sikhs in A.H. 1250, A.D. 1834.

TATTA تٹا

Lat. 24° 44' Long. 68° 0'

	G.	S.	C.
Nādir	—	1	—
Aḥmad	—	2	—
Taimūr	—	2	—

Tatta, as the name is written on the coins of the Mughal dynasty, is an old capital and port of Sind. According to Major H. G. Raverty it was founded when the Sammahs rose to power shortly before Muḥammad bin Tughlaq, Sultan of Delhi, died in A.H. 752, A.D. 1351 ('The Mihrān of Sind', *J.A.S.B.*, 1892, pp. 272, 329). Captain Walter Paynton, writing about the year 1612, mentions Diul (Dewal) near the mouth of the Indus, and says, 'Tatta is one of the most celebrated marts of India; Loor Bander (Lahrī Bandar) is the port of it'. Later in the seventeenth century Tavernier described Tatta as one of the greatest cities of India. Tatta now stands at the apex of the Indus delta, the navigable channels are silted up, and its old glories have departed. Mr. H. Cousens calls it Dewal-Thaṭṭah, and believes that the place approximately occupies the site of Debal or Dewal, an ancient port and one of the first towns in Sind to be attacked by the Arab invaders of the eighth century (*The Antiquities of Sind*, Calcutta, 1929, pp. 124 f.). M. R. Haig places Dewal some twenty miles south west of Tatta (*Indus Delta Country*, London, 1894, p. 47), but Cousens points out that the Tatta site was probably only half its present distance from the sea at the time of the Arab conquest. The view that Dewal, Lahrī Bandar and Tatta were different places is supported by the fact that Akbar struck coin at all three, probably in the same year (*P. M. Cat.*, Mint Notes).

Tatta was a prominent silver mint of the Mughal emperors; the latest coin of that series is a rupee of Aḥmad Shāh Bahādur. Owing to its remote situation, the money of this mint town is apt to display pleasing deviations from the uniformity of type prevailing elsewhere. Examples of this tendency are cited in my Mint Note on Tatta (*P. M. Cat.*, p. lxiv). The Bahāwalpūr hoard was rich in coins of Tatta mint, and I discovered specimens of all the great rarities, the most interesting being the first known couplet piece of Rafī'u-d-daula, Shāh Jahān II.

The rupee of Nādir Shāh of Tatta mint is new and unique; it is of the normal type and came from Bahāwalpūr. No date is visible but the issue was probably struck in the cold weather of 1152-3 while Nādir was campaigning in Sind. A few inferior silver coins are known of Aḥmad Shāh and Taimūr Shāh.

HAIDARĀBĀD. *See* SIND.

DERA ديرة

Lat. 34° 24' Long. 72° 59'

	G.	S.	C.
Aḥmad	7	31	7
Taimūr as Nizām	2	4	1
Sulaimān	—	2	—
Taimūr Shāh	3	27	3
Zamān	3	10	1
Maḥmūd. First reign	—	2	—
Shujā'. Second reign	1	3	—

The mint of Dera was at the frontier town of Dera Ghāzī Khān, west of the Indus. Its rise is described in the Note on Derajāt. Coins of Nādir Shāh are not known of Dera mint although he struck at Derajāt.

Dera was an important mint of Aḥmad, Taimūr and Zamān Shāh; their issues were found in great abundance at Bahāwalpūr. A rupee is listed of Aḥmad Shāh's first year; its reverse bears the lily which is characteristic of Dera mint. Coin 127 interrupts the series with an unusual three line arrangement of the couplet. In year 8 appears the effective central area type of obverse which at Dera is repeated in year 9. The same year sees a return to the normal couplet type and to the abbreviated reverse formula which omits the words *julūs maimanat mānūs*; this type continues to the end of the reign, year 26. The Catalogue records a fine series of rupees. Both gold and silver coins are in good style and of full weight. There are seven entries of copper. The same type persists from the first to the tenth year, but the weight varies considerably. There seems to have been no accurate striking to definite standards.

Dera is a mint of Taimūr as deputy for his father Aḥmad Shāh but only for the first three years of the Nizāmat. The coin sequence appears to be as follows. Aḥmad himself issued gold and silver at Dera in 1170; this date is not only called regnal year 10, which is quite correct, but also 12 and 13. Then comes the money of the first three years of Taimūr Shāh Nizām. All three years are listed in silver but the second year is missing in gold. Coin 342 is the only copper coin of the Nizāmat known to me; it is piece *C.J.R.*, 1891, p. 118, No. 27. Prince Taimūr's coinage now ceases to issue from the Dera mint and is replaced by that of his imperial father.

Silver coins were struck at Dera in the name of the pretender Sulaimān. I found a score of rupees of the couplet type at Bahāwalpūr but only one of a non-couplet type (Pl. V. 11).

Dera was one of the principal mints of Taimūr Shāh though I list only three different dates in gold. Coin 372 is a handsome piece; several hundreds of this issue were in a bag at Bahāwalpūr. The series of rupees must be almost complete. It begins with a non-couplet piece of year 1186, 1, modelled on the coin of Sulaimān of this type (Pl. VII. 4). There follows a coin, also of 1186, 1, on which the couplet is quite unusual both in arrangement and style (Pl. VII. 5). Then comes the normal series from the first to the nineteenth year; the style of the reverse changes slightly about year 9. In 1204, 19 appears the counterpart in silver of the fine gold coin mentioned above and illustrated at Pl. VI. 1. This type continues till the end of the reign, 1207, 21; to 1207 also belongs the exceptional piece shown at Pl. VII. 6. I only list three copper coins.

There are three gold coins of Zamān Shāh dated regnal years 1, 2, and 3; they bear his first couplet. The legends on the silver pieces are in a coarse, bold style and the first couplet persists from 1208, 1 to 1215, 7. This series is followed in 1215 by an issue in different style with a new arrangement of the reverse legend; there is no regnal date and the weight is five grains less. The copper coin has the same date as the specimen described by Mr. Longworth Dames (*Num. Chron.*, 1888).

The mint is represented in Maḥmūd's first reign by silver issues of the first and second years.

A gold coin is listed of Shujā'u-l-mulk Shāh's second reign, date 1218, 1, also silver issues of regnal years 1, 4, and 5. The rupees of Maḥmūd and Shujā' are good metal and full weight.

Dera was taken by the Sikhs in A.H. 1235.

DERAJĀT دیرجات

Lat. 32° 2'

Long. 72° 4'

	G.	S.	C.
Nādir	2	3	—
Aḥmad	3	6	—
Taimūr Shāh	—	24	—
Zamān	1	14	—
Maḥmūd. First reign	—	2	—
Shujā'. Second reign	—	9	—
Maḥmūd. Second reign	—	19	—

The Derajāt is the alluvial tract between the Sulaimān Range and

the Indus; the region takes its name from the three Deras or settlements of Dera Ghāzī Khān in the Lower Derajāt, and of Dera Ismā'il Khān and Dera Fath Khān in the Upper Derajāt. All three were founded towards the end of the fifteenth century, Dera Ghāzī Khān by the Baloch Mirāni chieftain Ghāzī Khān, and Dera Ismā'il Khān and Dera Fath Khān by the Baloch Hot leaders Ismā'il Khān and Fath Khān. Autonomous copper money issued from Dera Fath Khān, and the White King Sale Catalogue mentions a rupee of Nādir Shāh, legends and type not described. The mint of Derajāt, so-called, was situated in the town of Dera Ismā'il Khān, now in the North West Frontier Province. Gold coins of this mint are very scarce and copper not listed.

Nādir Shāh struck at Derajāt in gold and silver towards the end of his reign; the dates listed are 1158, 1159, and 1160. Nādir was assassinated in June, 1747, half way through the year 1160, and within a month Aḥmad, the Sadozai Afghan, was elected king at Qandahār. But Aḥmad Shāh did not strike money till 1161. In the period of confusion between Nādir's unexpected death and the consolidation of Aḥmad's power, coins issued at Derajāt in the name of the Mughal emperors Muḥammad Shāh (1160, 30) and Aḥmad Shāh Bahādur (1161, 1) (*P. M. Cat.*, pp. 331, 351).

Derajāt coins of Aḥmad Shāh are rare and are usually of inferior execution and style. Examples are the two gold coins illustrated at Pl. II. 10 and 11. The central area obverse type is known in both gold and silver. The mint name is written Derajāt and Derahjāt and there is diversity of reverse legend. Coins 160 to 162 are light weight. The last mentioned piece is of exceptionally good style for this mint (Pl. III. 15).

Gold of Taimūr Shāh is wanting but silver is common and a long series of rupees ranges from 1192 to the end of the reign. As with Aḥmad Shāh there are various arrangements of the reverse legend and the mint name is written both Derajāt and Derahjāt. Some coins exhibit inaccuracies of regnal date. The weight conforms with a standard of about 171 grains, seven less than the full Mughal weight of 178 grains. The general style is up to the average of Taimūr Shāh.

There is a handsome full weight gold coin of Zamān Shāh. The date is 1211 which on this specimen is called the second regnal year; it should be either 3 or 4. Silver entries number no less than fourteen. The weight standard of about 171 grains continues from Taimūr's reign; the first couplet is used throughout. Dates 1209, 1210, 1211, and 1212 are all called regnal year two. The mint is written Derahjāt till it becomes Derajāt in 1212, 2, and so remains till the end of the reign. Late coins of years 6, 7, and 8 exhibit the proper regnal years.

Mr. Longworth Dames has recorded 1212, 6, 1213, 7, and 1215, 8. The reverse of the later coins with mint name Derahjāt contains the pious ejaculation *هو*, 'He', the name of God.

Derahjāt rupees of Maḥmūd's first reign weigh 170 grains or so, and are dated 1216, 1 and 1217, 2. Mr. Longworth Dames has 1218, 2.

The second reigns of Shujā' and Maḥmūd are well represented but once more only in silver weighing up to 170 or 171 grains. The mint name is written Derahjāt throughout.

The Derajāt was annexed by Ranjit Singh in A.H. 1236.

RIKĀB رڪاب

		G.	S.	C.
Aḥmad.	Rikāb i Mubārak	1	—	—
Taimūr.	Rikāb	1	1	—
"	Rikāb i Mubārak	—	1	—
Shujā'.	" "	1	—	—

(Second reign)

The August Stirrup is the camp mint of the Durrānīs corresponding with the Urdū or Urdū i *Ẓafar Qarīn*, the Camp associated with Victory of the Mughal emperors.¹ The name Rikāb occurs alone, also as Rikāb i Mubārak; it is a very rare mint.

The gold coin of Aḥmad Shāh is remarkable and unique; it is the only piece in the entire series which bears the name of the month and must have been struck to commemorate the New Year's Day of the year A.H. 1173; Aḥmad was not in India at the time. The gold coin of Taimūr Shāh is also a solitary specimen and was bought at the Da Cunha Sale in 1889; its style indicates Pashāwar or its vicinity. Pashāwar was the winter capital where Taimūr spent much of his time. Coin 545 is on the Mughal model; the Rikāb rupee 546 is of Persian style. A Rikāb coin of Taimūr, year 1187, is mentioned on p. 386 of C. M. Fraehn's *Opusculorum Postumorum, Pars Prima*, Petropoli, 1855. A dozen gold coins of Shujā' like 979 were in a small wash-leather bag at Bahāwalpūr; no others are known to me.

¹ The term Rikāb was also used in and before Mughal times, e.g. *Ṭabaqāt i Naṣirī*, H. G. Raverty, London, 1881, p. 811. *Tāzūk i Jahāngīrī*, Rogers and Beveridge, London, 1914, vol. II, p. 131.

SIND

Lat. 25° 23' Long. 68° 25'

	G.	S.	C.
Nādir	1	7	—
Taimūr as Nizām	—	1	—
Taimūr <u>Shāh</u>	—	6	—
„ <u>Ḥaidarābād Sind</u>	—	1	—
„ <u>Ḥaidarābād</u>	—	1	—

Sind was ceded to Nādir Shāh together with the trans-Indus territory of the Mughal empire and the Persian invaded the Province in person during the winter of A.H. 1152-3 to exact tribute from its Kalhora rulers. Full weight rupees of Sind mintage are known from 1153 to the end of the reign in 1160 and were fairly numerous at Bahāwalpūr. The date is at the bottom of the obverse and is usually off the flan; a fine specimen is R. S. P., Pl. VII. 263. The only piece known to me in gold is at Vienna. Aḥmad Shāh Durrānī exercised absolute authority over Sind but did not strike coin there. The territory appears to have been administered by his son Taimūr as governor but Coin 300 is a single specimen. The modern capital Ḥaidarābād was founded by Ghulām Shāh Kalhora in A.H. 1182, A.D. 1768; older coins must have been struck at Tatta.

There was an invasion of Sind by Taimūr's general Madad Khān, and Taimūr Shāh on another occasion advanced in person as far as Shikārpūr. The Kalhoras were replaced by the Talpurs in A.D. 1786 and were confirmed as feudatories of Sind by Taimūr Shāh. Zamān Shāh determined to exact in person the arrears of tribute but penetrated no further than Multān. In A.H. 1218 Shujā' invaded Sind with a large army as far as Lārkāna. The later Durrānīs could not control this remote Province and no coins are known after Taimūr Shāh.

The Sind money of Taimūr is silver only and falls into three classes. There is a central area type struck at Sind and a similar issue with the double name Ḥaidarābād Sind. All are inferior in style, especially the light weight money of late date. Coin 492 is a unique specimen, undoubtedly of Taimūr's own striking, on which the mint name Ḥaidarābād is attended by the honorific epithet Khujista Bun-yād, 'of auspicious foundation'. This epithet on Mughal coins is confined to Aurangābād in the Dekkan.

SAHRIND (SARHIND)

Lat. 30° 38' Long. 76° 27'

	G.	S.	C.
Nādir	—	1	—
Aḥmad	4	7	—

The old town of Sarhind (Sahrind on these coins) occupied an important strategical position where Hindustan and the Panjab meet, on the royal road from Lahore to Delhi. The disintegration of the Mughal empire exposed it to continual attack. Nādir Shāh struck a silver coin at Sahrind on his return journey from Delhi which bears a new epithet *Dāru-l-aman*, Abode of Security. Sahrind was repeatedly occupied by Aḥmad Shāh; an issue of his first year testifies to a battle fought in this vicinity within ten months of the assassination of Nādir Shāh. The year 1161 was also the first regnal year of the Mughal emperor Aḥmad Shāh Bahādur who struck money at Sahrind in this and each of the five following years (*P. M. Cat.*, p. 356; *I. M. Cat.*, p. 253). This temporary revival of imperial influence terminated in the reign of 'Ālamgīr II. The Durrānī issues of 1174, 14 and 1174, 15 were struck during the memorable fifth invasion, before and after the battle of Pānīpat. There is also money of 1176 testifying to the sixth invasion. A year later Zain Khān, the Durrānī governor of Sahrind, was defeated by the Sikhs and the town was utterly destroyed. The modern town of Sarhind is in Patiala State, the coinage of which still exhibits the couplet of Aḥmad Shāh. It is said that the Sadozai in person, on the occasion of his last invasion, allowed the use of his coin legend to the Patiala chief Amar Singh at Sarhind (*J.A.S.B.*, 1885, Pl. II. 17).

SHĀHJAHĀNĀBĀD (DELHI)

Lat. 28° 39' Long. 77° 15'

	G.	S.	C.
Nādir	—	2	—
Aḥmad	7	5	—

After his easily won victory near Karnāl, Nādir Shāh entered Shāhjahānābād on the 9th of the twelfth month, A.H. 1151 or the 20th March, A.D. 1739. The general massacre took place there three days later and was followed by a systematic spoliation of the surviving citizens. Delhi was evacuated on the 7th of the second month, A.D. 1152. The conqueror authorized an issue of coin in the Mughal capital, in fact Jonas Hanway states that payments to the troops were made in Nādir's own coin.¹ This seems unlikely because Nādir

¹ *Hanway's Travels*, London, 1753, vol. IV, p. 183.

Shāh's silver money of Shāhjahanābād mint is scarce and gold unknown. Mr. C. J. Rodgers at the time he wrote an article on this subject only knew of three specimens, all silver and of year 1152.¹ I have seen perhaps forty rupees in all, of dates 1151 and 1152, but gold is still missing.

The issues of Ahmad Shāh are the results of the two expeditions to Delhi which completed the ruin of that unfortunate city. The first took place in the cold weather of A.D. 1756-7, A.H. 1170; the second led to a longer occupation. The Mahrattas were driven out of Delhi in February, 1760 (middle of A.H. 1173) and Ahmad Shāh passed the summer at Anūpshahr, some thirty miles to the east, temporarily losing control of the capital. A large Mahratta army was routed at Pānīpat on the 7th January, 1761 and Ahmad Shāh retook Shāhjahanābād. The Afghan troops had been more than a year in the plains of India and a serious mutiny frustrated the designs of their leader. He withdrew from Delhi on the 22nd March 1761 (A.H. 1174) never to return.

Pieces in gold and silver with legends in the imperial Delhi style are found of date 1170, 11. The issues of the second occupation, also in both metals, are dated 1173, 14 and 1174, 15. The former were struck in the spring of the year A.D. 1760 and the latter early in 1761 after the battle of Pānīpat. There are two arrangements of the obverse inscription, two styles (Durrānī and Mughal) and the size may be as much as 1.5 inches. Coin 172 is a single specimen of unique character (Pl. III. 14). It weighs only 62 grains and must be a presentation piece. The White King Sale Catalogue records a one-eighth of a rupee, date 11 (W. K., 2820).

'AZĪMĀBĀD (PATNA)

Lat. 25° 37' Long. 85° 12'

G.	S.	C.
Nādir	—	1 —

Patna in the eighteenth century was the capital of Bihar Province. It was renamed 'Azīmābād in honour of 'Azīmu-sh-shān, second son of prince Mu'azzam (afterwards Shāh 'Ālam Bahādur), who was appointed governor of Bengal and Bihar during the last years of the reign of his grandfather Aurangzeb. Money was struck at Patna and Murshidābād in the name of Nādir Shāh for identical reasons; I invite a reference to the Note on Murshidābād mint. The silver coin in the Guthrie Collection at Berlin is unique. The date is 1151

¹ 'On some Coins of Nādir Shāh struck in India', *Num. Chron.*, 1882, p. 324.

and the legend is that of the money of Muḥammad Shāh struck at Patna; the name Nādir is substituted for Muḥammad (Pl. I. 11). There is a rupee of the latter emperor dated 1152 in the Indian Museum, Calcutta (*I. M. Cat.*, No. 1891).

FARRUKHĀBĀD

Lat. 27° 24' Long. 79° 34'

	G.	S.	C.
Aḥmad	1	2	—

Farrukhābād took its name from Farrukhsiyar and is now the head-quarters of a District in the Province of Agra. It was one of the succession States of the Mughal empire and as such was founded by Nawab Muḥammad Khān, Ghazanfar Jang, a Pathan of the Bangash tribe who now live near Kohāt in the North West Frontier Province (W. Irvine, 'The Bangash Nawabs of Farrukhābād', *J.A.S.B.*, 1878 and 1879). Muḥammad Khān died in A.H. 1156. His second son Nawab Aḥmad Khān, Ghālib Jang, who ruled the territory from 1163 to his death in 1185, gave his name to Aḥmadnagar-Farrukhābād. Aḥmad Khān fought at Pānīpat and issued coin in the name of Aḥmad Shāh Durrānī. A reference is invited to the collective Note under Aonla. On the money of 1176, 15 the regnal year is not correct. The coins are broad handsome pieces in characteristic style.

Qandahār dominates southern Afghanistan and is a position of great strategic importance. The practical road to India is by way of the fertile tracts of Hirāt and Qandahār, not through the sterile and difficult passes between Kābul and Pashāwar. The Persians had held Qandahār since its capture from the Mughal Shāh Jahān in A.D. 1648, but the growing weakness of the Ṣafavī dynasty became unequal to the task of controlling this distant Province, and Qandahār fell to the Ghilzais about the year 1709. It was captured and destroyed in 1738 by Nādir Shāh after a prolonged resistance. During the course of the siege Nādir had chosen a site for a new city which he called Nādirābād. He restored the Abdālīs from exile at Hirāt to their original lands near Qandahār. Aḥmad Shāh Abdālī or Durrānī was crowned at Qandahār and later built a capital there, which he named Aḥmad Shāhī, the Most Noble of Cities. His successor Taimūr moved the capital to Kābul.

Qandahār is one of the principal Afghan mints. The coins are well struck, artistic, of full weight and good metal. There are autonomous issues in copper.

Nādir Shāh struck silver money at Qandahār in the year 1150. Coin 44 is a double rupee of Indian weight while 45 and 46 are of Nādir's Persian standard; all are of the نادر السلطان type. Nādirābād silver coins dated 1151 and 1152 are of similar type and denominations.

Few examples of Aḥmad's Aḥmad Shāhī currency are described in earlier Catalogues but there was no lack of them in the Bahāwalpūr Toshakhāna. The name of the mint is attended by its honorific epithet *Ashrafu-l-bilād*, Most Noble of Cities. Qandahār is the scene of Aḥmad's coronation, he built his new capital and was buried there, yet he did not issue coin from Qandahār till he could inscribe the name Aḥmad Shāhī upon his money ten years after his accession. The earliest issue is dated 1171, 11 three years before the battle of Pānīpat. The initial gold coinage consists of a thin broad piece equivalent to the Persian *ashrafī* in weight; other dates listed in gold are 22 and 23. The silver coins are of the full Indian rupee standard and run from the eleventh year to the end of the reign. From the seventeenth year the coins exhibit the *ḡulūs maimanat mānūs*, Regnal Year associated with Prosperity formula derived from the Mughal currency.

'After Aḥmad Shāh's funeral, the Vazir Shāh Walī Khān seated his son-in-law Sulaimān Shāh, half brother of Taimūr Shāh, on the throne at Aḥmad Shāhī, and had the *khutba* read in his name', (*Wāq'āt i Durrānī*). As we are specifically informed that the ephemeral king Sulaimān acceded at Aḥmad Shāhī I was specially pleased

to find rupee 344 at Bahāwalpūr, one of two known specimens. It contains the مهر و ماء couplet and the reverse is similar to that of Aḥmad's last year. The form سنة احد instead of the usual سنة احد is unusual.

Aḥmad Shāhī is one of Taimūr's principal mints; gold and silver were struck here throughout the reign. The reverse of the first year money reproduces Sulaimān's mint side inscription. The year 1204 witnesses the introduction of an arrangement of the reverse legend characteristic of this mint (Coin 356). This continues with modifications till the end of the reign. The coins are good broad pieces of full weight.

Aḥmad Shāhī is the only known mint of the claimant Humāyūn who disputed the succession with Shāh Zamān. Gold and silver of the same type have come to light. I discovered two gold pieces and a score of rupees at Bahāwalpūr and do not know of any other source.

Shāh Zamān struck abundantly at Aḥmad Shāhī in gold and silver. These issues are broad good pieces of full weight and are about the best of the dynasty. That of the first year reproduces the reverse of Humāyūn's coinage, derived in its turn from the reverse type of the last years of Taimūr Shāh. The obverse is first occupied by what I call couplet Z1. In the year 1212 this is replaced by couplet Z2 without change either in the reverse legend or in style. A type of the seventh and eighth years exhibits both couplets; couplet Z1 occupies the obverse and couplet Z2 is arranged in a circular margin around the normal reverse legend. The foregoing remarks hold good for both metals. Two double rupees, once the property of Mr. Longworth Dames and now belonging to Mr. P. Thorburn, require special notice. Each piece is a single specimen. Coin 756 is of the eighth year type just mentioned. Coin 751 has both couplets on the obverse, an arrangement found on the double rupees of Kābul mint (Pl. IX. 14). Gold coin Pl. IX. 1 is the only piece known to me of the entire Durrānī series on which Aḥmad Shāhī is given its old name of Qandahār.

Maḥmūd Shāh struck rupees at Aḥmad Shāhī in all three years of his first reign; probably gold also of similar types though only 1218 is exemplified in the nobler metal. Coin 930 is of the same Persian denomination as 3 of Aḥmad Shāh. In 1217 appeared a broad well-executed piece with the invocation يا محمود as an addition to the reverse inscription.¹ The type continues into the next year; sometimes يا محمود is replaced by يا عزيز, O Mighty One.²

¹ One of the three names of the Prophet—Muḥammad, Aḥmad, Maḥmūd.

² One of the ninety and nine Excellent Names of God.

In the year 1218 coins in gold and silver were struck at Aḥmad Shāhī by prince Qaiṣar, son of Shāh Zamān; in style they are much like those just described and are broad well struck pieces of full weight. The gold coin is a single specimen. I found quite a number of rupees at Bahāwalpūr, their only source as far as I know.

The beautiful coins of the second reign of Shujā' correspond closely in form and style with those of Maḥmūd, of which they are a continuation. Coin 974 is a thin broad piece in gold weighing 47 grains. All seven years of the second reign are represented in silver; there is a quarter rupee of 1218. The arrangement of the couplet changes in 1222.

Maḥmūd Shāh regained Aḥmad Shāhī in the year 1224; the earlier coins of his second reign repeat the couplet of the first reign. Coin 1066 of year 1222 shows that there was some overlapping with Shujā'. The only gold piece listed is a thin broad coin weighing 37.5 grains; the date is not certain. The silver series is quite representative. Maḥmūd's first reign couplet is employed till 1226; the invocation *يا محمد* reappears on Coin 1068 of year 1224. In the year 1226 the obverse legend changes to the *حسن دیگر* (Second Ḥasan) distich peculiar to the second reign. Coin 1073 is of full weight, but later pieces as exemplified by specimens of years 1229, 1230, 1231 and 1233 are light weight coins conforming to a standard of about 160 grains.

The Aḥmad Shāhī rupee of Aiyūb Shāh is a single specimen (Pl. XIII. 16). This coin and 1201, also of this puppet king, are the only Durrānī pieces known to me which contain the Kalima, the Muḥammadan Profession of Faith.

Shujā' struck silver coins at Aḥmad Shāhī in the year 1255 on a reduced standard of 140–150 grains. They bear a couplet peculiar to his third reign which is found on Kābul rupees of the same date and weight.

Coin Pl. XIV. 15 is an Aḥmad Shāhī rupee of Faṭḥ Jang, date 1258, weight 141 grains. It, like the Aiyūb rupee of this mint, is a single specimen. Both coins came from my Cabinet.

At the beginning of the eighteenth century the territory of Kābul still remained an Indian province, but the Mughal authority was on the wane and the administration had fallen into confusion. After the capture of Qandahār, Nādir Shāh marched by Ghazni to Kābul; the place could offer little resistance and the citadel surrendered on the 22nd May 1738. Taimūr Shāh removed the seat of government from Qandahār to Kābul.

The Kābul money, like that of Aḥmad Shāhī, consists of well-executed pieces in good metal exhibiting the entire legends. As a rule they are of the full Mughal weight standard. Again, as at Aḥmad Shāhī, there is no copper issue apart from autonomous pieces.

It is unexpected to find that Nādir Shāh struck at Kābul in one year only, 1157; both metals are represented. Kābul is called by its Mughal title *Dāru-l-mulk*, Seat of Royalty. Other dates ought to come to light because Kābul remained firmly in Nādir's hands from the time of its capture early in 1151 till his death. Probably Coin 48 dated 1159, 7, is of Kābul mint but the name is written *كابل*, a version I have not seen elsewhere, attended by the honorific title *Dāru-s-saltānat*, Seat of the Sultanate.

The currency of Aḥmad Shāh begins with a piece of unusual character dated 1161, 1, exemplified in both metals (Pl. II. 19). The obverse contains a three line arrangement of the couplet. The reverse inscription is a reproduction of that found on Muḥammad Shāh's coins (*P. M. Cat.*, Nos. 2329, 2530); Kābul is called *Dāru-l-mulk*. This reverse type is found in silver of the third year but the couplet is now of the more usual four line form. On coins of the fifth year Kābul is called *Dāru-s-saltānat* and so remains for the rest of the Durrānī régime. Attention is invited to Coin 179 of year 8 (Pl. III. 17). A central area type of this date is characteristic of Dera, Derajāt and Multān mints but the Kābul piece is a single specimen. I acquired it at Lahore. The Mughal formula *julūs maimanat mānūs*, Regnal Year associated with Prosperity, reappears on this occasion. The gold coin of the tenth year illustrated at Pl. II. 17 is a fine piece of true Durrānī type. There is an excellent series of rupees from the year 1170, 10 to the end of the reign; date 1172 is missing. The arrange-

ment of the reverse legend changes; Pl. III. 20 is quite unusual. The word سنه may or may not be present. Finally in 1175, 15 (Coin 189) the reverse inscription (Pl. II. 18) becomes static; as a rule both Hijri and regnal dates appear on this side. The Kābul coins of Aḥmad Shāh are full of variety and interest. There were hundreds of them at Bahāwalpūr. The series catalogued is quite representative.

The pretender Sulaimān struck at Kābul in both metals. There is a long couplet on the obverse; the reverse legend is similar to that on the coins of Aḥmad Shāh's last year. I found two or three gold coins (Pl. V. 7) and some twenty rupees at Bahāwalpūr. The silver coins exhibit two arrangements of the couplet.

Taimūr Shāh struck gold and silver at Kābul in 1186, the year of Aḥmad's death and Sulaimān's suppression. The reverse is that of Sulaimān's coins and the obverse is occupied by a three line version of Taimūr's ingenious but tedious couplet. This type continues till and including 1189, 3. In 1189, 3 appears a four line arrangement of the couplet with the Hijri year on the obverse together with an exceptional presentment of the reverse legend; this outstanding type exists in both metals (Pl. VI. 2). But the same year 1189, 3 sees a reversion to something more ordinary (Coin 560). The latter type continues with modifications of the obverse till the year 1204; the series is interrupted by Coin 572 of 1201. Coin 577 of 1204, 18 revives the reverse arrangement of 572 and this type runs to the end of the reign in 1207, 21.

Shāh Zamān began in great style with the fine broad pieces illustrated at Pl. VIII. 14. They contain his first couplet Z 1; the arrangement of the reverse is symmetrical and effective. The second couplet Z 2 appears on a coin of 1212, 4 and continues till the end of the reign, latest date 1215, 8; there is some overlapping as the first couplet is found on a specimen of year 5 (Coin 813). A half and a quarter rupee are listed; fractional denominations are extremely rare. Handsome double rupees were issued in years 1212 and 1213; the obverse exhibits both couplets. The specimen illustrated at Pl. IX. 14 is a fine broad coin with ample margins; it is in the Fitzwilliam Museum, Cambridge. The issue of these double rupees must have been large because a fair number have survived; there were none at Bahāwalpūr. Coin 824 is a posthumous issue of light weight, date 1258. The Kābul coins of Taimūr Shāh and Shāh Zamān, like those of Aḥmad, were found in abundance at Bahāwalpūr.

Gold of Maḥmūd's first reign is not represented. There are rupees of all three years.

The rupee of Sultān Qaiṣar illustrated at Pl. XII. 10 is unique;

it was in my Cabinet. The couplet is clearly different from those on the Aḥmad Shāhī and Kashmīr coins but cannot be read without the aid of other specimens.

Kābul coins of Shujā'ū-l-mulk Shāh's second reign appear to be quite rare. I have catalogued one in gold and two in silver, all three British Museum specimens. The obverse legend is a four line arrangement of the normal couplet.

The coins of Maḥmūd's second reign exhibit a couplet in which he is called Sulṭān Maḥmūd, the second Ḥasan. The gold piece of the eighth year in the British Museum is a broad handsome coin; the lettering of the reverse legend is expanded in a bold decorative style known as *ṭughrā* (Pl. XII. 14). The rupees of the second and fifth years are full weight; that of year eight conforms to a standard of about 165 grains.

The Kābul currency of Aiyūb appears to be very scarce; one specimen, a rupee, is catalogued. It is on the reduced standard of some 165 grains and exhibits the usual couplet.

Shujā'ū-l-mulk Shāh was restored at Kābul by British arms in A.H. 1255, A.D. 1839. Coins were freely struck in both gold and silver and are listed in one or the other metal of years 1255, 56, 58, and 59; date 1257 is missing. Kābul was evacuated by the British garrison on the 6th January 1842 and Shujā' was murdered three months later. The Hijri year 1258 began on the 12th February 1842; the money of year 1259 is posthumous. The only type catalogued in gold is Pl. XIV. 10; all three coins listed are full weight. The rupee illustrated at Pl. XIV. 12 is a broad coin weighing 177 grains. It was followed in the same year, 1255, by a similar piece but of the normal diameter and weight some thirty grains less. During the remainder of the dynasty the rupees conform to this Bārakzai standard of about 145 grains. Coin 1220 of 1255 is a couplet piece; the couplet is elucidated for the first time. The same distich is found on the silver money of Aḥmad Shāhī mint. On a rupee of year 1259 the title *Durr i Durrān* is revived.

Rupees of Faṭḥ Jang are known on the weight standard of about 145 grains, and of year 1258. A few specimens of type Pl. XIV. 17 exist. The solitary couplet coin cannot be read without the aid of other specimens. A third type exhibits the title *Durr i Durrān*.

Aiyūb	—	2	—

Coins bearing the mint name Kashmīr were struck at Srinagar, the capital of the Province. Kashmīr is in a different category from such Indian mints as Sind. It was not ceded by the Mughals to Nādir Shāh but was taken from them by Aḥmad Shāh Durrānī. This outlying mountain valley, remote and difficult of access, was in the times of the later Durrānīs a refuge for rebels and pretenders and a bone of contention between Afghans and Sikhs. The coins of Kashmīr mint, as might be expected, are apt to differ from the general Durrānī issues. Gold is very rare; only five coins of this metal are listed and all are up to the full Mughal weight standard. On the other hand, copper is unusually abundant. The silver currency of Taimūr Shāh and his successors is struck to a reduced standard of about 170 grains; the metal is often debased though the style is up to the average. G. Forster visited Kashmīr in 1783 during the reign of Taimūr Shāh and has something to say about the coinage. 'The rupee is the current coin of Kashmire, and that struck at Moradabad in Rohilcund is held in the greatest estimation. From the baseness of the silver a large discount is allowed on that of Kashmire. Copper money of the value of a halfpenny and cowreys, a small marine shell, compose the other currency of this province.' (*Journey from Bengal, &c.*, London, 1808.)

There are aberrations of regnal date which may or may not be significant. The copper coins are sometimes just lumps of metal and the weights differ so much that it is difficult to deduce definite standards.

The solitary gold piece of Aḥmad Shāh Durrānī, dated 1167, 6 is the sole numismatic memorial of the Afghan invasion of the Happy Valley in A.D. 1753-54. There was an interlude marked by an issue of coin in the name of 'Alamgīr II. Kashmīr was annexed to the

Durrānī empire in A.D. 1762, A.H. 1176, and a silver currency was established in the same year. Rupees of Aḥmad Shāh are by no means common; even the best specimens weigh three or four grains less than the full Mughal standard of 178 grains. There are different arrangements of the legends. Copper is very scarce. The specimens catalogued belonged to Mr. R. Sutcliffe and have been described by Mr. Valentine. They were collected in Kashmīr fifty years ago by a missionary, the Rev. J. Doxie.

A rupee struck in the name of the pretender Sulaimān was an unexpected and pleasing discovery; I found the coin in Srinagar itself.

Taimūr Shāh coined extensively in silver and copper but the two gold coins in the Rodgers Collection at Lahore are the only specimens in this metal known to me. On one of them Kashmīr is called *Dāru-s-saltānat*, 'Seat of the Sultanate', an epithet which is found on no other coin of this mint.¹ The second gold coin is a fine broad piece which exhibits a deviation from the normal couplet, the word *کند*, 'may make', being displaced by *د*; 'may strike'.

Rupees with the *د*; couplet appeared regularly throughout the reign. The style is good and characteristic of the mint but the metal is apt to be inferior and the weight standard is only about 170 grains. This reduced standard is retained till the end of the dynasty. As at other mints there are aberrations of regnal date. Taimūr Shāh began to reign in 1186, so his first year is 1186-7 and year 10 is 1195-6. But according to the Kashmīr rupees this tenth regnal year is 1197-8. Similarly year 12 is 1199-1200, year 17 is 1204-5, and year 19 is 1206-7; on these data the first regnal year should be 1188-9. All the catalogued rupees on which both Hijri and regnal dates are legible support this inference except the earliest coin of all, which is dated 1187, 1. I cannot say if the matter has any significance. Copper coins of Taimūr are common to this day in the Srinagar bazar. The year 13 is 1200-1 as on the rupees.

Zamān Shāh also struck abundantly in silver and copper at Kashmīr. The earliest listed rupee is dated 1208, 2 (Pl. IX. 8). This type runs till 1212, 5. In the same year the words *julūs mairmanat mānūs* are dropped from the reverse legend and the mint is called *Khitta Kashmīr*, the territory or district of Kashmīr (Pl. IX. 9). The new style is repeated in 1213, 6 but that year sees another arrangement of the same reverse legend surrounded by an ample margin (Pl. IX. 10). This recurs in 1213, 7 and 1214, 7. Finally in 1214, 7 the epithet *Khitta* is omitted and this last type continues into the eighth

¹ Entry 75 of Longworth Dames' *Coins of the Durrānīs* is incorrect.

year (Pl. IX. 11). The rupees of Zamān Shāh are well struck and exhibit the entire legends but the metal is inferior and the weight standard is about 170 grains as already remarked. The regnal dates are correct. Kashmīr is the only common copper mint of Zamān. A sword appears sometimes as the mint mark; the weights vary considerably. It is possible to deduce heavy, medium and light denominations of say 210, 170, and 120 grains respectively, but one piece of 267 grains is far heavier than the rest and corresponds to the heavy copper coins of Taimūr.

The silver currency of Maḥmūd's first reign bears his general couplet. It includes a quarter rupee of date 1217, 2 (Pl. X. 13). The reverse type changes in 1218, 3 to that illustrated at Pl. X. 14. Copper coins are catalogued of years one and two.

Silver coins were struck at Khitta Kashmīr in the name of Qaiṣar Shāh; the dates are 1222, 1 and 1223, 2.

The rupees of the second reign of Shujā' bear a couplet peculiar to Kashmīr mint (p. xxxii). All years are recorded from 1218 to 1223 inclusive. The reverse of some of the copper coins merely bears the regnal year and a sword or swords.

Handsome double mohurs, on the full Mughal standard of 168 grains, were struck at Khitta Kashmīr bearing the name of the country's patron saint Shāh Nūru-d-dīn (pp. xxix-xxx). Two or three specimens are known of date 1225, 2 with a square area obverse (Pl. XIII. 10). The companion piece of 1225, 3 (Pl. XIII. 11) is the only specimen known to me. The silver coins of Nūru-d-dīn range from 1223, 1 to 1228, 5. The handsome and unique piece illustrated at Pl. XIII. 12 weighs 224 grains, the only silver coin of this weight throughout the Durrānī series. I found several copper coins in the Srinagar bazar; they are lumps of metal weighing from 115 to 120 grains. A legible Hijri date is 1225.

The Kashmīr coins of Maḥmūd's second reign are difficult to interpret. Shujā' (1218-24) was defeated by Maḥmūd in 1224 and Maḥmūd's precarious tenure of power ended in his ejection from Kābul by the Bārakzais in 1233. Thereupon Maḥmūd retired to Hirāt. Maḥmūd's rupees are of Khitta Kashmīr and bear the legends found on the last issue of his first reign (Pl. X. 14) with different arrangement and style. The earliest piece on the list is dated regnal year 6, but the unit figure of the Hijri date is illegible; the piece of the seventh year has the full date 1225. It is plain that these regnal years count from the first reign.

Four Kashmīr rupees are recorded on p. 357 of Mr. Longworth Dames' *Coins of the Durrānīs* under the name of Muḥammad Shāh, with dates 1227, 28, 30, and 32. There is no word of explanation

beyond the reference to Mr. W. Theobald. I do not know of any Durrānī Muḥammad Shāh who struck coin. The mystery is explained by an entry in the Theobald Sale Catalogue, 1901, 'Durrani or Afghan rupees of Nuruddin Muhammad Shah of Kashmir (4).' The rupees appear to be either of Shāh Nūru-d-dīn or of Maḥmūd Shāh.

The name of the Sadozai princeling Aiyūb Shāh, who held his court under sufferance at Pashāwar, is found on Kashmīr rupees of dates 1234, 1 and 1234, 2. On the issues of 1234, 1 the mint is called Khitta Kashmīr. The couplet contains a punning allusion to Aiyūb's protector, the Bārakzai chief Muḥammad 'Azīm Khān.

Kashmīr was annexed by Ranjit Singh in A.H. 1234, A.D. 1819.

LĀHOR.

Lat. 31° 35' Long. 74° 20'

	G.	S.	C.
Nādir	1	2	—
Aḥmad	2	18	—
Taimūr <u>Shāh Nizām</u>	2	3	—
Zamān	1	2	—

Nādir Shāh, in his advance upon Shāhjahānābād, occupied the capital of the Panjab in December, A.D. 1738 (ninth month of year A.H. 1151). He returned by Lāhor at the end of the following May, or early in A.H. 1152, which year began on April 10th, A.D. 1739. Coins of Lāhor are very rare; four specimens are known. The mint name is attended by its epithet Seat of the Sultanate. The only piece of date 1151 is the double mohur of the نادر السلطان type in the British Museum. Its poor style and abnormal weight are suspicious but it is probably genuine.¹ There is a fine double rupee dated 1152 at Berlin. The couplet type is exemplified by two rupees; that catalogued was in my Cabinet, while the second is Coin 2782 in the Third Part of the White King Sale Catalogue.

Aḥmad Shāh invaded India soon after his accession, and Afghan troops entered Lāhor on the 22nd January 1748; this was also the first month of A.H. 1161 which commenced on the 2nd January. The Durrānī retired to Qandahār at the end of that cold weather and Lāhor was reoccupied by the Mughals at the beginning of April. Aḥmad again took Lāhor in April, 1752 (A.H. 1165), and annexed the

¹ The coin was acquired by the British Museum from Mr. C. J. Rodgers. It is the piece illustrated at *Num. Chron.*, 1882, Pl. XV and R. S. P., Pl. VII. 215.

north west Panjab. Five years later he deputed his son Taimūr to govern the Panjab, the Derajāt and Sind. These events are reflected in the coinage. Gold and silver were struck at Lāhor in the year 1161. The initial type bears the usual couplet on the obverse while the reverse has the words 'Aḥmad Shāh, Emperor, Pearl of Pearls' in addition to the normal legend. There is a gap between 1161 and 1165 according to expectation and the Mughal emperor Aḥmad Shāh Bahādur was issuing money in these years (*P. M. Cat.*, p. 359). The Durrānī coinage recommences in 1165, 5 but there is another hiatus till the tenth year with the Mughal 'Ālamgīr II striking in 1168, 1169, 1171, and 1172 (*P. M. Cat.*, p. 374). The coins of Taimūr Shāh as governor are dated 1170, 1171 and 1173. It was a very disturbed time and the currency reflects the prevailing confusion. 'Ālamgīr II was assassinated in 1173 and Mughal coins cease with the end of his reign. Durrānī rupees continued to issue from 1173 till 1180 when Lāhor was taken by the Sikhs. A Sikh rupee of Lāhor mintage dated *Sambat* 1823 or A.D. 1766, equivalent to A.H. 1179-80, inaugurates a regular issue by the Sikh commonwealth.

Taimūr Shāh took no steps to enforce his claims in the central Panjab. Shāh Zamān invaded India and occupied Lāhor without serious opposition on two separate occasions. He entered that city at the beginning of A.D. 1797 but was compelled to retire by the rebellion of his half brother Maḥmūd at Hirāt. Zamān again penetrated as far as Lāhor in November, 1798, but once more had to beat a hasty retreat owing to the invasion of Khurāsān by a Persian army. There are numismatic memorials of both Indian adventures. I found several pieces at Bahāwalpūr in gold and silver of an issue struck at Lāhor in 1211, 4 by Shāh Zamān. These coins exhibit the first couplet. Coin 840 is a broad handsome rupee dated 1213, 6 of the second couplet type. It is a solitary specimen and was collected by me in Lāhor itself.

MURĀDĀBĀD.

Lat. 28° 49'	Long. 78° 49'		
	G.	S.	C.
Aḥmad	—	1	—

Murādābād is a town in Rohilkhand. Rupees dated 1173 were struck here in the name of Aḥmad Shāh by his ally Najibu-d-daula. A reference is invited to the collective Note under Aonla.

MURSHIDĀBĀD

Lat. 24° 11' Long. 88° 18'

	G.	S.	C.
Nādir	—	6	—

The issue of money in the name of Nādir Shāh so far afield as Murshidābād, the capital of Bengal, is explained in a passage from Gladwin's Bengal Narrative; it was due to the fear inspired by the deeds of the ferocious tyrant and to the pusillanimity of the Mughal governor. 'When Nādir Shāh plundered Dehly, every part of Hindostan was filled with the dread of a visitation by the merciless invader. Sirafrāz Khān (deputy governor of Bengal) ordered coin to be struck and the *khutba* to be read in the name of Nādir Shāh, and remitted to him the revenues of Bengal. After Nādir Shāh's departure, these actions were used by his enemies to injure Sirafrāz Khān with Muḥammad Shāh'. (F. Gladwin, *Bengal Narrative*, Calcutta, 1788, p. 155.)

Nādir Shāh's coins of Murshidābād mint are very scarce, and are known only in silver. A rupee of date A.H. 1152 was illustrated by J. D. Koehler in 1746 but it does not exhibit enough of the legend to ensure a satisfactory reading.¹ O. G. Tychsen embodied the reference on p. 212 of his *Introductio in Rem Numariam Muhammedanorum*, Rostock, 1794. The Christ Church coin, dated 1151, is by far the best I have seen and is the only specimen which shows enough of the inscription to make the reading practically certain. The legend is found on no other issue. The Ashmolean Museum, Oxford, has a rupee of year 1152 together with the half, quarter, eighth and sixteenth, a unique feature. All were struck from dies much too large and the legends are fragmentary. The Kaiser Friedrich Museum, Berlin, possesses all the denominations of year 1152 except the half and the sixteenth. No other fractional piece of Nādir Shāh is known.²

Attention is invited to the unique rupee 57 (Pl. I. 18). There is only a vestige of the mint name which may possibly be Murshidābād; the date is 1152. The legends on both faces differ from all the rest; the reverse presents the ampler invocation: 'May God perpetuate his kingdom and his autocracy'.

¹ J. D. Koehler, *Historische Münz-Belustigung*, Nürnberg, 1746, vol. 18, p. 105.

² I repeat the substance of the relevant part of my paper 'Some Notable Coins of the Mughal Emperors of India', *Num. Chron.*, 1930.

MULTĀN

Lat. 30° 12' Long. 71° 30'

	G.	S.	C.
Nādir	—	1	—
Aḥmad	8	19	2
Taimūr as Nizām	5	37	—
Taimūr <u>Shāh</u>	2	19	13
Zamān	1	6	7
Maḥmūd. First reign	—	2	—
<u>Shujāʿ</u> . Second reign	2	2	1
Maḥmūd. Second reign	—	—	19
Aiyūb	—	1	—

The ancient and historic city of Multān was a regular mint of the Mughal emperors. It was annexed by Aḥmad Shāh Durrānī in A.H. 1165.

I did not know that Nādir Shāh had coined at Multān till I found two or three rupees at Bahāwalpūr. The issue is limited to 1152, the year of his return from Delhi; Muḥammad Shāh also struck at Multān in this year (*P. M. Cat.*, p. 348). The mint name is accompanied by the epithet *Dāru-l-amān*, Abode of Security; this occurs on the Mughal pieces of the first four years of Aurangzeb. There is a double rupee of Nādir in the Hunterian Collection, Glasgow.

Aḥmad Shāh Bahādur issued money at Multān till 1164, 4 (*P. M. Cat.*, p. 361); the first issue of Aḥmad Shāh Durrānī is dated 1165, 5 and is found in both gold and silver (Pl. IV. 5). The tulip mint mark, so characteristic of the Multān money, appears on the second issue of 1165, 5; like the epithet, it dates from Aurangzeb's reign. The epithet itself comes into use on the central area coins of the eighth year. This central area type of year 8 is common to Multān, Dera, Derajāt and Kābul mints, and at Multān is repeated in 1169, 9; this ninth year sees a reversion to the usual four line arrangement of the couplet. There are several models of 1170, 10; on the last issue of this date the mint name is found without the epithet. Some copper coins are known, usually in poor condition. The dates listed are 1170, 10 and 1172, 12. It is surprising to find the latter year because Taimūr was in full possession of the mint from 1170 as his father's governor.

The striking of money at Multān is continued without a break from 1170, 1 to 1185, 16 by Taimūr Shāh as governor for his father, with his own sequence of regnal dates. The series of rupees in the Panjab Museum is almost complete. The three line arrangement of the couplet does not change but the Hijri year may occur in the first,

the second or the third line, all illustrated on Pl. V. As on Aḥmad's latest coin, the mint name on the first issue of Taimūr Shāh Niẓām is without the epithet. The date is 1170, 1 and it is listed in both gold and silver of the same type. In 1172, 2 the epithet appears and continues for the rest of the reign except on an issue of 1173, 2 (Coin 311). There are no less than five entries for the year 1173, 2. The Mahrattas held Multān in parts of 1172 and 1173 and struck rupees there in the name of 'Ālamgīr II (N. S. XLII, p. 70 N). The last Durrānī issue of 1173, 2 (Coin 315) exhibits a different arrangement of the reverse from that illustrated at Pl. V. 4 and this variety with modifications is minted till 1178, 9. In 1179, 9 the words *julūs maimanat mānūs* are dropped from the reverse and type Pl. IV. 17 continues till the end of the reign. All Taimūr Shāh Niẓām's coins of Multān mint are good pieces of the full Indian weight standard.

Multān gold of Taimūr Shāh is scarce; only two specimens are listed, both of 1203, regnal dates 9 and 10. The silver coins confirm the supposition that the early regnal dates at Multān do not count from 1186, the year of accession. The earliest date catalogued in silver is 1194, 3; at other mints 1194 is the eighth year. The year 1198 is 5, 6, and 7. Time stands still in the seventh year which is the regnal equivalent of 1198, 1199, 1200 and 1201. This confusion is due to the fact that Multān was taken by the Sikhs in 1185 and not recovered by the Afghans till 1194 (Cunn., pp. 122, 123). I found at Bahāwalpūr Sikh rupees of Multān mint which cover the period of occupation (*Sambats* 1829 to 1836 inclusive). There are rupees of Taimūr Shāh of 1203, 9 and 1203, 10 which resemble the gold coins, also of 1204, 10 of the same rather inferior type. But now there is a sudden change for the better. In the same year 1204 appeared a broad coin in good style and of the correct regnal date 18 (Pl. VII. 17); this type continues to the end of the reign, the latest piece in the list being of 1207, 20. The gold and silver coins throughout are of full weight; the mint name is always attended with the epithet. There was an abundant copper issue. Coin 702 bears Taimūr Shāh's imperial titles but appears to be of 1181, the period of the Niẓāmat; the coin may have been restruck. Apart from this anomalous piece, the earliest copper coin, as in silver, is dated 1194, 3. The series exhibits the abnormal regnal dates of the rupees till, as in the case of the silver coins, the type changes and we get the correct issues of 1205, 19 and 1206, 20. The standard appears to be about 185 grains.

The only gold coin of Shāh Zamān described in the Catalogue is a piece at Bahāwalpūr of date 1210 and first regnal year (instead of 3 or 4). Coin 841 is a fine rupee of the first year (Pl. IX. 13). The couplet differs from that of other mints; the word *قرار* 'permanency',

is replaced by طراز 'adornment'. There are silver coins of 1207, 1208, 1209 and 1210, all described as the first year, abnormalities of regnal date comparable with those of Taimūr Shāh. A gap occurs till 1215 which is correctly designated year 8. Copper, as of Taimūr, is fairly plentiful and of the same type and weight standard. The regnal dates are correct.

The first reign of Maḥmūd Shāh is represented by two rupees only, dates 1216 and 1218, both termed first regnal year.

Coins of the second reign of Shāh Shujā' are rare but specimens are listed in all three metals. The copper piece resembles those of Taimūr and Zamān.

The issues of Maḥmūd's second reign are restricted to copper. Coins in this metal are plentiful and cover a long series of dates. Multān was taken by the Sikhs in June, A.D. 1818, A.H. 1233, and subsequent money in the name of Maḥmūd Shāh must have been authorized by them.

The reading Multān on a rupee of Aiyūb Shāh is not certain; the date 1239 is equivalent to A.D. 1823-24. Like the silver coin of Aḥmad Shāhi, date illegible, this rupee bears the Kalima and is a single specimen.

NAJĪBĀBĀD

	Lat. 29° 36'	Long. 78° 23'	
	G.	S.	C.
Aḥmad	1	1	—

Najībābād is a town in the Bijnor District of the Province of Agra; it took its name from the Rohilla chief Najibu-d-daula. Coins dated 1180 were struck here by Najibu-d-daula in the name of Aḥmad Shāh. This issue must have been occasioned by the Durrānī's last invasion of India, although the Afghan did not advance beyond the Sutlej. At this time Najibu-d-daula was Vazir at Delhi and coins were being struck at Najībābād in the name of Shāh 'Ālam II, including an issue of year 1180.

HIRĀT

	Lat. 34° 29'	Long. 62° 8'	
	G.	S.	C.
Aḥmad	1	5	—
Taimūr <u>Shāh</u>	7	45	—
Zamān	2	10	—
Maḥmūd (continuous at Hirāt)	—	48	—
Kāmrān	—	4	—

Hirāt is the principal city in the valley of the Harī Rūd River in

the north west corner of Afghanistan. The strategic and commercial importance of Hirāt are due to its situation where roads from India, Persia, and Bukhāra converge; the locality is so fertile that the place has been called 'the granary and garden of Central Asia' (G. B. Malleson's *Herat*, London, 1880). Ibn Hauqal recorded a glowing description of Hirāt in the tenth century and Ibn Batuta, who visited the place about the year A.D. 1340, wrote of it as the most important city of *Khurāsān*. Hirāt was taken by the Persians in A.D. 1510 and remained in their hands till it surrendered to the Afghan Abdālīs in 1717; it was recovered for Persia by Nādir *Shāh* early in the year 1738.

Aḥmad *Shāh* took Hirāt from the Persians in the autumn of A.D. 1748, A.H. 1161, and this important frontier stronghold remained in Durrānī hands till the end of the dynasty. Aḥmad can only have struck spasmodically at Hirāt as his money of this mint is quite rare. Coins are known of both gold and silver. They are usually dateless and inferior in style but are up to the full Indian weight standards. The only legible date recorded is 1171. The name of the mint is generally attended by its epithet *Dāru-s-saltānat*, Seat of the Sultanate.

Taimūr *Shāh* struck abundantly at Hirāt in gold and silver on the full Indian standards. There is a long series of rupees which exhibits frequent and capricious changes in the arrangement of the legends and in the position of the dates. As a rule the earlier coins omit and the later pieces show the epithet *Dāru-s-saltānat*. The initial issues bear the pre-accession date 1184. The year 1192 has three different settings of the couplet, one in gold and two in silver. In 1204 commence the characteristic broad issues illustrated at Pl. VII. 20 and Pl. VIII. 1 which continue to the end of the reign. Coin 667 is a small piece weighing only 14 grains. Posthumous issues were minted for ten years after the death of Taimūr *Shāh*.

Hirāt was governed by Maḥmūd, and *Shāh* Zamān did not strike money there till the time of his expedition against Hirāt where he arrived on the 14th October, 1797 (fourth month of A.H. 1212). Gold and silver coins issued in 1212 with the second couplet; this type continued to the end of the reign.

Maḥmūd *Shāh* maintained a hold on Hirāt throughout the vicissitudes of his career and I have listed his Hirāt silver separately. I do not know of any gold issue bearing the name of Maḥmūd *Shāh*. The silver coins must have been struck in great abundance. They are common in the bazars and fifty thousand lie at Bahāwalpūr. Every year is represented in the Catalogue from 1216 to 1238 inclusive. The rupee of 1242 is accompanied by a half and a quarter. There are two

halves of 1243; one reverse has the interpolation يا هو, 'O He (God)'. This long series is monotonous and without distinction; the striking is shallow. The coins become dumpy and debased though the weight is fairly well maintained; the metal quality deteriorates after 1232 and the striking of fractions of the rupee in Maḥmūd's closing years also points to a growing scarcity of bullion.

Kāmrān became master of Hirāt after the death of his father Maḥmūd and a few reduced weight silver coins of Kāmrān are known. Pieces of a couplet and of a non couplet type are listed. The latter appear to be quarter rupees while the couplet type is known in the rupee and half rupee size. Dates catalogued are 1248 and 1252; L. White-King had a rupee of year 1254 (W.K. 2895). Kāmrān was expelled from Hirāt by Yār Muḥammad Bārakzai in A.H. 1258.

IV

SHUJĀ'U-L-MULK SHĀH

First reign A.H. 1216.

A.D. 1801.

Maḥmūd Shāh defeated Shāh Zamān in the summer of A.D. 1801 and succeeded him at Kābul. Shāh Shujā', the full brother of Zamān, proclaimed himself at Pashāwar (p. xxvii) and advanced against the capital but was defeated in September 1801. No coins can at present be assigned with certainty to this brief reign at Pashāwar.

V

MAḤMŪD SHĀH

(At Hirāt)¹

A.H. 1216-1245.

A.D. 1801-1829.

SHUJĀ'U-L-MULK SHĀH

(At Pashāwar and Kashmīr)

A.H. 1227-1228.

A.D. 1812-1813.

Æ 1048 B.M.	پشاور Pashāwar	1227 1	On dotted field in circle within broad margin contained by dotted circle ۱۲۲۷ السلطان شجاع الملك شاه W. 177. S. .9.	Within elaborate circular border س و جلو پشا ب احد سنة Pl. XI. 13.
-------------------	-------------------	-----------	--	--

Metal No.	Mint	Date	Obverse	Reverse
Æ 1049 B.M.	پشاور Pashāwar	1227 1	In dotted circle شاه شجاع الملك ۱۲۲۷ W. 14.5 (rubbed). S. 45. See p. xxvii.	In dotted circle پشاور ب ضر احد Pl. XII. 4.
Æ 1050 B.M.	کشمیر Kashmīr	1228 1	۱۲۲۸ سنة فلوس W. 139. S. 8.	احد سنة کشمیر ضر ب
1051 B.M.	"	1228 1	۱۲۲۸ سنة فلوس W. 116. S. 65. The attribution of these copper coins to <u>Shāh Shujā'</u> is tentative, pp. xxvii-xxviii.	 احد  The mint name is absent, but the coin can be attributed with certainty to Kashmīr. This piece is described and illustrated on pp. 242, 243 of W. H. Valentine's <i>Copper Coins of India</i> , Part 2.

SHUJĀ'U-L-MULK SHĀH

(At Pashāwar)

Probably in A.H. 1233.

A.D. 1818.

Æ 1052 B.M.	پشاور Pashāwar	— 1	In double circle on flowered field برسيم و زر سکه شاه شجاع نامور شد W. 164. S. 9.	In ornate octagon on flowered field ضر ب س و ر جلو پشا احد سنة Pl. XI. 14.
This is a unique coin with a new couplet. In the absence of a Hijri date, attribution is difficult; the piece in weight and reverse design corresponds with <u>Shāh Mahmūd's</u> Pashāwar rupees of years 1230 to 1233. I believe the coin was struck when <u>Shāh Shujā'</u> entered Pashāwar in A.D. 1818—see page xxviii.				

QAIŞAR SHĀH

(At Qandahār)

A.H. 1218.

A.D. 1803.

MAḤMŪD SHĀH¹

Second reign A.H. 1224–1233. A.D. 1809–1818.

Α 1058 ² B.M.	احمد شاهی Ahmad Shāhī <i>Ashrafu-l-bilād</i>	1224 ?	In double circle on dotted ground, couplet of first reign much as on 929. Probably Persian denomination. W. 37.5. S. 1.1.	On dotted ground in square with mihrabs as 1053. The coin is rubbed and the dates are uncertain.
1059 B.M.	بہاولپور Bahāwalpūr	1225 1	As 931, but different style; ۲۰ beneath middle line. W. 171. S. .85.	سنة احد As 931, but M. 48.

¹ Maḥmūd was driven out of Kābul by the Bārakzais in A.D. 1818, A.H. 1233. He ruled on sufferance at Hirāt till his death in 1245.

² This coin is noteworthy for its light weight. I attribute the piece to Maḥmūd's second reign because of its style. The framework of the reverse legend is that of Qaiṣar Shāh's Aḥmad Shāhī money, so the coin was probably struck after 1218.

^A 1060 ¹ L.D.	کابل Kābul <i>Dārū-s-salṭānat</i>	1224 2	Couplet as below. W. 169. S. .9. The couplet is:— سکه دولت بزر و سیم فزود حسن دیگر سلطان محمود 'Made abundant coin of the realm on gold and silver The second Ḥasan, Sulṭān Maḥmūd.'	^۲ سنة ضرب دار السلطنة کابل
1061 B.M.	"	122— 8	In triple circle on flowered field, couplet as 1060. Date to r. under top line.	In <i>tughra</i> , surrounded by triple border, as 1060. ^ Pl. XII. 14.
^R 1062	احمدپور Aḥmad-pūr	1217 <i>sic</i> 48	Couplet arranged as on 931; l. middle line ۱۲۱۷. W. 128. S. .8.	مانوس میمنت ^{۱۴۸} سنة جلوس ب ضر احمدپور To r. of middle line M. 48.
1063 B.M.	"	12— 48	As 1062, but ۱۲ above middle line. W. 127.	As 1062.
1064	"	— 49	As 1062, but no Hijri date visible. W. 129.	" ^{۱۴۹}

¹ I repeat the description, with modifications, from Coin 80 of Longworth Dames's monograph. I suggest that what was read by Mr. Dames and Mr. Rodgers as خسرو دیگر is *vide* Appendix. Coin 13 of Mr. Dames's own Plate shows distinctly that the title is not خسرو دیگر. On all coins known to me the forms فزود and بزر are used, not افزود and بزرزر as read by Mr. Dames.

Metal No.	Mint	Date	Obverse	Reverse
A/ 1174	كشمير Kashmīr <i>Khitta</i>	1225 2	In central square on flowered field ۲ سنه كشمير خطه ضرب To r. يا شاه Above نور الدين To l. يا مخدوم Below جهان Double mohur. W. 335.2. S. .95.	In triple circle spread over entire field. ۱۲۲۵ ب کلا طالها جيفة و الدنيا ‘The world is carrion and the seekers thereafter are dogs.’ Pl. XIII. 10.
1175	„	1225 3	شاه نور الدين يا يا مخدوم جهان ب ۳ سنه كشمير خطه ضر W. 335. S. .95. The legend is the same as that on 1174, but is differently arranged. يا شاه نور الدين يا مخدوم جهان ‘O <i>Shāh Nūru-d-dīn</i> , O Lord of the World.’	As 1174. ۱۲۲۵ Pl. XIII. 11.

¹ The patron saint of rural Kashmīr. The coins are discussed on pp. xxix-xxx. The invocation on the gold pieces shows that *Shāh Nūru-d-dīn* is an object of veneration, a saint. The word عارف on the silver coins means one who has arrived at the knowledge of God, the highest grade to which a mystic can attain; قطب العارفين is a *Ṣūfī* expression sometimes used as an epithet for Plato. The word سكة can mean ‘the path’ in the sense of a rule of life; there is a play on words here as in other coin couplets, their only literary merit.

SHAH PŪR SHĀH

A.H. 1258.

A.D. 1842.

Metal No.	Mint	Date	Obverse	Reverse
Æ 1229A B.M.	کابل Kābul <i>Dāru-s-salṭanat</i>	1258	--- الطاف الـ ¹ شاه ۱۲۵۸ شہ پور --- لم ستان --- سرو زد --- W. 145. S. .85.	As 1226. ۱۲۵۸

(See illustration, p. 189.)

UNASSIGNED²

Æ 1230 Vienna	قندھار Qandahār	—	In square the Kalima. To r. عثمان Below ع ----- S. .85.	چو ----- ن سکہ محمود جهانگیر ----- شاه قندھار ----- Pl. XIV. 9.
Æ 1231	دیر میان Dair-i-Miyān?	—	در درانہ [محمود] د شاه ----- W. 181. S. .8.	In circle دیر میان ضرب

¹ The couplet is:—[*Sikka*] *zad* [- - -az] *altāf i Ilah*; *Khusrū i 'alam silān Shahpūr Shāh*. This unique rupee was in my Cabinet. It was issued at Kābul in the name of Shahpūr, younger brother of Fath Jang, during the British occupation in A.D. 1842. After the departure of the British, Shahpūr was speedily ejected by Akbar Khān, son of Dost Muḥammad Bārakzai. See Ferrier's *History of the Afghans*, p. 384, and G. P. Tate's *Kingdom of Afghanistan*, p. 148.

² I was inclined to attribute the silver coin to Jahlāngīr, son of Kāmran and grandson of Mahmūd Shāh but find at the British Museum that it has been placed amongst the issues of the Ghilzai conqueror Shāh Mahmūd; he ruled Persia from A.H. 1135 to 1137. The copper piece is in good style, and the mint is clear enough. I do not know of any place called Dair i Miyān, or half-way house. Dair means a Dervish settlement, a tavern, and occurs in Persian place names. There is also Dīr where lived the chief of the Panjkora Yūsufzais.

Coin of Shahpūr Shāh (see p. 187.)

APPENDIX

P. xvii. For Yūsafzai, read Yūsufzai.

P. xxiv. The classic account of the invasion of A.D. 1756-7 is that contributed by W. Irvine to the *Indian Antiquary*, 1907. The terrible sack of Muttra is described on p. 62.

P. xxv, Footnote 2. For a discussion of the original authorities see Oskar Mann's *Quellenstudien zur Geschichte des Aḥmed Šāh Durrānī. Zeitschrift der deutschen morgenländischen Gesellschaft.* Leipzig, 1898.

P. xxviii. The word suggested as سکه on Coin 1051 is probably سکه.

P. xxxii. The Panjab States of Patāla, Jind, Nabha, and Maler Kotla obtained the right to coin from Aḥmad Shāh. All issues were modelled on the piece of Aḥmad's fourth year, and there has been no change in the die beyond the addition of the mark of the ruling chief (*Indian Antiquary*, 1928, p. 151).

P. xxxiii. The titulars Faṭh Jang and Shāhpūr Shāh are the last of the Sadozais.

P. xxxiv. For rupiya, read rūpiya.

P. xl. Coin 1103 of A.H. 1250 is the last Durrānī rupee struck at Bahāwalpūr; the milled piece dated 1251 described on p. xl is the initial State issue. In the same year was struck an unmilled rupee with a different reverse legend, the *julūs maimanat mānūs* formula and mint Aḥmadpūr. This unmilled type is the first of a long series of light weight rupees struck at either Aḥmadpūr or Bahāwalpūr; I found all dates from 1252 to 1265 inclusive. The mint Khānpūr appears later, e.g. on a rupee of year 1280.

P. liii. He (Aḥmad Shāh) remarked, 'The rupee of Farrukhābād is better looking and better made than that from any other place in India'. *Indian Antiquary*, 1907, p. 50.

P. liii. Zamān. Aḥmad Shāhī. G. 3. S. 19.

P. lxi. The epithet *Dāru-s-saltanat* associated with Kashmīr is found three centuries earlier on gold coins of the Sultans of Kashmīr (*Num. Chron.*, 1933).

P. lxii. The closing sentence of the last paragraph is not accurate. The Afghan governor issued money in the name of the local saint (p. xxix); at the same time partisans of Kābul struck rupees of the second reign of Maḥmūd Shāh with blundered regnal dates. These dates, if anything, run straight on from the second reign of Shujā'.

P. lxiv. Mr. C. J. Rodgers published a Lahore rupee of *Sambat* 1822. *On the Coins of the Sikhs, J.A.S.B.*, 1881.

P. 157. The Shāh's title on Coins Pl. XIII. 1 and 3 and other pieces is written حسن دیگر; the name Ḥasan should be حسن. On the face of it one would expect one of the four letters ح followed by س or ش; no word of this kind suits either context or metre. The word حین 'time', or the name حنین do not seem likely. I cannot suggest anything better than 'the second Ḥasan'. Maḥmūd Shāh's strength lay on the Persian side of Afghanistan.
